

November 11, 2020

The following Management's Discussion and Analysis ("MD&A") is intended to assist readers in understanding Medical Facilities Corporation (the "Corporation"), its business environment, strategies, performance, outlook and the risks applicable to the Corporation. It is supplemental to and should be read in conjunction with the unaudited interim condensed consolidated financial statements and accompanying notes (the "financial statements") of the Corporation for the three and nine months ended September 30, 2020, which have been prepared in accordance with IAS 34 *Interim Financial Reporting*, the audited consolidated financial statements and accompanying notes of the Corporation for the year ended December 31, 2019 ("annual financial statements"), which have been prepared in accordance with International Financial Reporting Standards ("IFRS"), and the Corporation's annual MD&A for the year ended December 31, 2019 ("annual MD&A").

Substantially all of the Corporation's operating cash flows are in U.S. dollars and all amounts presented in the financial statements and herein are stated in thousands of U.S. dollars, unless indicated otherwise.

Additional information about the Corporation and its annual information form are available on SEDAR at www.sedar.com.

1. CAUTION CONCERNING FORWARD-LOOKING STATEMENTS

Certain information in this MD&A may constitute “forward-looking information” within the meaning of applicable securities legislation. All information contained in this MD&A, other than statements of current and historical fact, is forward-looking information. Forward-looking information includes, but is not limited to, the discussion of the Corporation’s business and operating initiatives, focuses and strategies, expectations of future performance and consolidated financial results, and expectations with respect to cash flows and level of liquidity. Generally, forward-looking information can be identified by use of words such as “may”, “will”, “could”, “should”, “would”, “expect”, “believe”, “plan”, “anticipate”, “intend”, “forecast”, “objective” and “continue” (or the negative thereof) and other similar terminology. All of the forward-looking information in this MD&A is qualified by this cautionary statement.

Forward-looking information is not, and cannot be, a guarantee of future results or events. Forward-looking information is based on, among other things, opinions, assumptions, estimates and analyses that, while considered reasonable at the date the forward-looking information is provided, inherently are subject to significant risks, uncertainties, contingencies and other factors that may cause actual results, performance or achievements, industry results or events to be materially different from those expressed or implied by the forward-looking information. The material factors or assumptions that were identified and applied in drawing conclusions or making forecasts or projections set out in the forward-looking information include, but are not limited to: the successful execution of business strategies, consistent and stable economic conditions and conditions in the financial markets, and the consistent and stable legislative environment in which the Corporation operates.

Inherent in the forward-looking information are known and unknown risks, uncertainties and other factors that could cause actual results, performance or achievements, or industry results, to differ materially from any results, performance or achievements expressed or implied by such forward-looking information. Those risks, uncertainties and other factors that could cause actual results to differ materially from the forward-looking information include, but are not limited to: the duration and impact of the novel coronavirus (“COVID-19”) on the Corporation’s financial position and operations, ability to obtain and maintain contractual arrangements with insurers and other payors, ability to attract and retain qualified physicians, availability of qualified personnel or management, legislative and regulatory changes, capital expenditures, general state of the economy, competition in the industry, opportunity to acquire accretive businesses, integration of acquisitions, currency risk, interest rate risk, success of new service lines introductions, ability to maintain profitability and manage growth, revenue and cash flow volatility, credit risk, operating risks, performance of obligations/maintenance of client satisfaction, information technology governance and security, risk of future legal proceedings, insurance limits, income tax matters, ability to meet solvency requirements to pay dividends, leverage and restrictive covenants, unpredictability and volatility of common share price, and issuance of additional common shares diluting existing shareholders’ interests, and other factors set forth under the heading “Risk Factors” in the annual MD&A and under the heading “Risk Factors” in the Corporation’s most recently filed annual information form (which is available on SEDAR at www.sedar.com).

Given these risks, uncertainties and other factors, investors should not place undue reliance on forward-looking information as a prediction of actual results. The forward-looking information reflects management’s current expectations and beliefs regarding future events and operating performance and is based on information currently available to management. Although management has attempted to identify important factors that could cause actual results to differ materially from the forward-looking information contained herein, there are other factors that could cause results not to be as anticipated, estimated or intended. The forward-looking information contained herein is current as of the date of this MD&A and, except as required under applicable law, the Corporation does not undertake the obligation to publicly revise these forward-looking statements to reflect subsequent events or circumstances.

2. NON-IFRS FINANCIAL MEASURES

The Corporation uses certain non-IFRS financial measures which it believes provide useful measures for evaluation and assessment of the Corporation's performance. Non-IFRS financial measures do not have any standard meaning prescribed by IFRS, are unlikely to be comparable to similar measures presented by other issuers, and should not be considered as alternatives to comparable measures determined in accordance with IFRS as indicators of the Corporation's financial performance, including its liquidity, cash flows, and profitability.

The Corporation uses the following non-IFRS financial measures which are presented in Section 7 of this MD&A under the heading "Reconciliation of Non-IFRS Financial Measures" and reconciled to the applicable IFRS measures:

- **Cash available for distribution** is a non-IFRS financial measure of cash generated from operations during a reporting period which is available for distribution to common shareholders. Cash available for distribution is derived from cash flows from operations before changes in non-cash working capital and certain non-cash adjustments, less maintenance capital expenditures, payments on lease liabilities, interest and principal repayments on non-revolving debt obligations, and non-controlling interest in cash flows at the Facility (defined below) level. The Corporation calculates cash available for distribution in U.S. dollars and translates it into Canadian dollars using the average exchange rate applicable during the period.
- **Cash available for distribution per common share** is a non-IFRS financial measure calculated as the cash available for distribution divided by the weighted average number of common shares outstanding during the period.
- **Distributions** is a non-IFRS financial measure of cash distributed to holders of common shares, more commonly referred to as dividends.
- **Earnings before interest, taxes, depreciation and amortization** ("EBITDA") is a non-IFRS financial measure defined as income for the period before (i) finance costs, (ii) income taxes, (iii) depreciation of property and equipment, (iv) depreciation of right-of-use assets, (v) amortization of other intangibles, and (vi) share of equity loss (income) in associates.
- **Adjusted EBITDA** is a non-IFRS financial measure defined as EBITDA before impairment of goodwill, and transaction costs on the sale of controlling interest in Unity Medical and Surgical Hospital ("UMASH").
- **Payout ratio** is a non-IFRS financial measure calculated as total distributions per common share in Canadian dollars divided by cash available for distribution per common share in Canadian dollars.

3. BUSINESS OVERVIEW

The Corporation is a British Columbia corporation. The capital of the Corporation is in the form of publicly traded common shares. The Corporation's current quarterly dividend on its common shares is Cdn\$0.07 per share (refer to Section 10 "Share Capital and Dividends" of this MD&A under the heading "Dividends").

The Corporation's operations are based in the United States. Through its wholly-owned U.S.-based subsidiaries, Medical Facilities America, Inc. ("MFA") and Medical Facilities (USA) Holdings, Inc. ("MFH"), the Corporation owns controlling interests in, and/or controls by virtue of retaining approval rights over certain significant governance matters, and derives substantially all of its income from, 10 limited liability entities (each

a “Facility” and, collectively, the “Facilities”), each of which own either a specialty surgical hospital (an “SSH”) or an ambulatory surgery center (an “ASC”). The 10 Facilities are comprised of four SSHs located in Arkansas, Oklahoma, and South Dakota, and six ASCs located in California, Michigan, Missouri, Nebraska, Ohio and Pennsylvania. ASCs are specialized surgical centers that only provide outpatient procedures, whereas SSHs are licensed for both inpatient and outpatient surgeries. The SSHs and ASCs provide facilities, including staffing, surgical materials and supplies, and other support necessary for scheduled surgical, pain management, imaging, and diagnostic procedures and derive their revenue primarily from the fees charged for the use of these facilities. The Facilities mainly focus on a limited number of clinical specialties such as orthopedics, neurosurgery, pain management and other non-emergency elective procedures. In addition, three of the SSHs provide urgent care services and two of the SSHs provide primary care services to their communities.

The Corporation also owns a 92% controlling interest in RRI Mishawaka Hospital, LP (“RRIMH”), which owned the real estate assets underlying UMASH until their sale on June 30, 2020, as described below. This entity does not own any other assets and will be wound up.

COVID-19

On March 11, 2020, the World Health Organization designated COVID-19 as a global pandemic. The outbreak began to impact the Corporation’s and Facilities’ operations in the latter half of March 2020. All Facilities were affected by the pandemic as elective cases were restricted, either voluntarily or by U.S. government mandate, including the temporary closure of three of the MFC Nueterra ASCs, which reopened in May 2020. Management expects patient volumes and revenues to be negatively impacted until the effects of the pandemic begin to subside and the economy stabilizes.

Management believes the extent of the COVID-19 pandemic’s adverse impact on the Corporation’s operating results and financial condition will be driven by many factors, most of which are beyond management’s control and ability to forecast. Such factors include, but are not limited to, the scope and duration of past and potential future stay-at-home policies and business closures, continued decreases in patient volumes for an indeterminable length of time, increases in the number of uninsured and underinsured patients as a result of higher unemployment, incremental expenses required for supplies and personal protective equipment, and changes in professional and general liability exposure. Because of these and other uncertainties, management cannot estimate the length or severity of the impact of the pandemic on the business. Decreases in cash flows and results of operations may have an impact on the inputs and assumptions used in significant accounting estimates, including management’s assessment of future compliance with financial covenants, estimated implicit price concessions related to uninsured patient accounts, professional and general liability reserves, and potential impairments of goodwill and long-lived assets.

The *Coronavirus Aid, Relief, and Economic Security (CARES) Act* (the “CARES Act” or the “Act”) was signed into law on March 27, 2020. The Act includes provisions for financial assistance to hospitals, surgery centers and health care providers via, among other provisions, the Public Health and Social Services Emergency Fund (“PHSSEF”), the Paycheck Protection Program (“PPP”) and expansion of an existing Centers for Medicare and Medicaid Services accelerated payment program.

The PHSSEF is administered by the Department of Health and Human Services (“HHS”) to provide eligible healthcare providers with relief funds to cover non-reimbursable expenses, including lost revenue, attributable to COVID-19. Funds not utilized for eligible expenses and not applied to lost revenues must be returned. The recognition of amounts received is conditioned upon the provision of care for individuals with possible or actual cases of COVID-19 after January 31, 2020, certification that payment will be used to prevent, prepare for and respond to coronavirus and shall reimburse the recipient only for healthcare related expenses or lost revenues that are attributable to coronavirus, and receipt of the funds. The Facilities received \$13.1 million in total funding from the HHS as of September 30, 2020, and recognized \$10.0 million in revenue as government stimulus

income for the nine months ended September 30, 2020. The remaining amount of \$3.0 million may be repayable, and was recorded as a liability as of September 30, 2020. For the three months ended September 30, 2020, the Facilities received \$1.4 million in funding and recognized \$1.5 million as government stimulus income.

The PPP expands the guaranteed lending program under Section 7(a) of the *Small Business Act* administered by the US Small Business Administration (“SBA”). Under the PPP, certain Facilities have received \$12.2 million and recognized \$12.1 million as government stimulus income for the nine months ended September 30, 2020. The remaining amount of \$0.1 million is expected to be recognized as income in the fourth quarter. For the three months ended September 30, 2020, certain Facilities recognized \$0.1 million as government stimulus income. The loan amounts received are eligible for forgiveness to the extent they are used for certain qualifying expenses and to maintain payroll levels and related expenses during the 8-week period (extended to 24 weeks) following loan origination. Despite recognizing the PPP income in the period based on reasonable assurance that the Facilities have met the requirements for forgiveness, there is some uncertainty over the final outcome as applications for forgiveness of the PPP loans must still be formally submitted and approved subsequent to September 30, 2020.

Under the expansion of the Medicare Accelerated and Advance Payment Program most providers and suppliers can request an advance of three to six months of Medicare payments. Repayment of these accelerated/advance payments begins one year after issuance, and payments will be recouped at defined rates against future Medicare claims. Certain Facilities have received net advances of \$23.2 million, and recorded all in payor advances and government stimulus funds repayable as at September 30, 2020.

In addition to the CARES Act, the *Families First Coronavirus Response Act* (“FFCRA”) was signed into law on March 18, 2020. This program mandates COVID-19 related family medical and paid sick leaves for employees and provides tax credits to reimburse employers for both sick leave and family medical leave. Certain Facilities have qualified for the tax credits and recorded government stimulus income of \$1.0 million for the nine months ended September 30, 2020 and \$0.4 million for the three months ended September 30, 2020.

One Facility also received other stimulus funds under state programs of \$0.6 million as of September 30, 2020, and recognized \$0.5 million in revenue as government stimulus income for the three and nine months ended September 30, 2020. The remaining amount of \$0.1 million is expected to be recognized as income in the following quarter.

There is uncertainty regarding the implementation, duration and impact of the CARES Act and other existing or future stimulus legislation, if any. There can be no assurance as to the total amount of financial assistance or types of assistance the Facilities will receive, that the Facilities will be able to comply with the applicable terms and conditions to retain such assistance, that the Facilities will be able to benefit from provisions intended to increase access to resources and ease regulatory burdens for health care providers or that additional stimulus legislation will be enacted.

Sale of Controlling Interest in UMASH

On February 24, 2020, the Corporation sold the majority of its interest (decreasing to 31.7% from 87.6%) in UMASH to a group of local investors (the “Buyers”), including leading physicians affiliated with South Bend Orthopedics, The South Bend Clinic, and Allied Physicians of Michiana. As of the date of the transaction, the Corporation no longer consolidates the financial results of UMASH and accounts for its interest under the equity method of accounting.

The Corporation received \$1.1 million in cash consideration for its equity interests, subject to customary adjustments. In connection with the transaction, the loan receivable by the Corporation from UMASH (“loan receivable”) was reduced by \$3.0 million, with the remaining \$20.0 million structured on a five-year term at an

interest rate of 6.75%, adjusted annually, secured by the Buyers' equity in UMASH. The Buyers have options to acquire more of the Corporation's equity interest in UMASH on both the first and second anniversaries of the transaction closing for the greater of the current per share purchase price or the fair market value of the interest at the time the purchase option is exercised. In the event that the Corporation's ownership in UMASH falls below 25%, all of the UMASH debt owed to the Corporation would be required to be immediately repaid. The Buyers and the Corporation made capital contributions to fund working capital post-closing; the Corporation's total obligation is approximately \$1.4 million, of which \$0.8 million has been funded.

On June 30, 2020, the Corporation sold the real estate assets underlying UMASH to investors affiliated with the Buyers for net proceeds of \$24.7 million. The net proceeds from the sale were used to reduce the outstanding balance on the Corporation's operating credit facility.

In connection with the combined UMASH transactions of the sale of the Corporation's controlling interest and the underlying real estate assets, the Corporation recorded a gain on sale of \$8.2 million, which was offset by an impairment loss reserved on the loan receivable. During the nine months ended September 30, 2020, the Corporation recorded an impairment gain on the loan receivable of \$0.7 million. The Corporation also incurred transaction costs of \$0.5 million, which are included in general and administrative expenses from continuing operations.

Other Information

On June 30, 2020, the operations of an urgent care centre affiliated with Arkansas Surgical Hospital, LLC located in Sherwood, Arkansas were shut down. As a result of this closure, the Corporation recorded a \$0.4 million pre-tax loss on impairment of leasehold improvement assets (part of property and equipment) and the right-of-use asset on its premises lease. This loss is included in general and administrative expenses from continuing operations.

On September 30, 2020, the Corporation sold all of its 52.78% controlling ownership interest in Two Rivers Surgical Center to a group of managing physicians who were non-controlling interest holders for net proceeds of \$1.0 million. As of the date of the transaction, the Corporation no longer consolidates the financial results of Two Rivers Surgical Center. In connection with this transaction, the Corporation recorded a pre-tax gain of \$0.2 million.

Facility service revenue ("revenue") and certain directly related expenses are subject to seasonal fluctuations due to the timing of case scheduling, which can be impacted by the vacation schedules of surgeons, as well as the extent to which patients have remaining deductibles on their insurance coverage, based on the time of year. Occupancy related expenses, certain operating expenses, depreciation and amortization, and interest expense remain relatively steady throughout the year.

Revenue for any given period is dependent on the volume of the procedures performed as well as the acuity and complexity of the procedures ("case mix") and composition of payors ("payor mix"), including federal and state agencies (under the Medicare and Medicaid programs), managed care health plans, commercial insurance companies and employers. Various payors have different reimbursement rates for the same type of procedure which are generally based on either predetermined rates per procedure or discounted fee-for-service rates. Medicare and Medicaid typically have lower reimbursement rates than other payors.

Revenue is recorded in the period when healthcare services are provided based upon established billing rates less adjustments required by contractual arrangements with the payors. Estimates of contractual adjustments under payor arrangements are based upon the payment terms specified in the related contractual agreements and payment history.

The volume of procedures performed at the Facilities depends on, among other things: (i) the Facilities' ability to deliver high quality care and superior services to patients and their family members; (ii) the Facilities' success in encouraging physicians to perform procedures at the Facilities through, among other things, maintenance of an efficient work environment for physicians as well as availability of facilities; and (iii) the Facilities' establishment and maintenance of strong relationships with major third-party payors in the geographic areas served. The case mix at each Facility is a function of the clinical specialties of the physicians and medical staff and is also dependent on the equipment and infrastructure at each Facility.

Non-controlling interests in the Facilities are indirectly owned, primarily by physicians practicing at the Facilities. Upon acquisition by the Corporation of indirect controlling interests in the SSHs located in Arkansas, Oklahoma, and South Dakota, the non-controlling interest owners were granted the right to exchange up to 14% (5% in the case of ASH) of the ownership interest in their respective Facilities for common shares of the Corporation. The liability associated with this derivative instrument is recorded on the consolidated balance sheet. To date, the non-controlling interest owners of two of the eligible Facilities have exercised portions of their exchangeable interests.

Summary of Facility Information as of September 30, 2020

	Arkansas Surgical Hospital ("ASH")	Oklahoma Spine Hospital ("OSH")	Black Hills Surgical Hospital ("BHS")	Sioux Falls Specialty Hospital ("SFSH")	The Surgery Center of Newport Coast ("SCNC")	MFC Nueterra ASCs

Distributions ⁽³⁾	C\$ 2,177	C\$ 8,749	C\$ 6,532	C\$ 26,222
Cash available for distribution per common share ^{(3) (4)}	C\$ 0.409	C\$ 0.170	C\$ 0.960	C\$ 0.496
Distributions per common share ⁽³⁾	C\$ 0.070	C\$ 0.281	C\$ 0.210	C\$ 0.844
Payout ratio ^{(3) (4)}	17.1%	165.3%	21.9%	170.2%

⁽¹⁾ Comparative results have been restated for discontinued operations.

⁽²⁾ Net income from continuing operations attributable to owners of the Corporation fluctuates significantly between the periods due to variations in finance costs, primarily in the value of exchangeable interest liability and, until December 31, 2019, in the value of convertible debentures, impairment gains recorded on the loan receivable, and income taxes. These charges are incurred at the corporate level rather than at Facility level. On the other hand, net income from continuing operations attributable to non-controlling interest represents the interest of the Facilities' non-controlling interests in the net income of the Facilities on a stand-alone basis and, therefore, does not vary as significantly between the periods.

⁽³⁾ Non-IFRS financial measure. Please refer to Section 2 under the heading "Non-IFRS Financial Measures", Section 7 under the heading "Reconciliation of Non-IFRS Financial Measures" and Section 5 under the heading "Reconciliation of net income for the period from continuing operations to EBITDA and Adjusted EBITDA."

⁽⁴⁾ Cash available for distribution, cash available for distribution per common share and payout ratio are not restated for discontinued operations.

Selected Financial Information for the Three Months Ended September 30, 2020 Compared to the Three Months Ended September 30, 2019

For the three months ended September 30, 2020, total revenue and other income from continuing operations was \$98.8 million, an increase of 2.4% from \$96.5 million for the same period in 2019. Facility service revenue from continuing operations of \$96.3 million decreased by 0.2% from \$96.5 million for the same period in 2019, primarily due to a decline in case volume, with the COVID-19 pandemic affecting the volume of elective surgeries in some Facilities. This was partly offset by the combined impact of case and payor mix, and the recognition of government stimulus income. EBITDA was \$24.6 million or 24.8% of total revenue and other income from continuing operations compared to \$0.4 million or 0.4% of total revenue and other income from continuing operations for the same period last year, mainly due to the prior year \$22.0 million impairment charge on goodwill for the MFC Nueterra ASCs cash-generating unit, as well as the impact of government stimulus income. Net income for the period from continuing operations was \$9.8 million compared to net income of \$8.7

million for the same period in 2019, with the increase mainly attributable to the prior year goodwill impairment charge, partly offset by the change in the value of exchangeable interest liability versus the prior year (refer to Section 5 “Consolidated Operating and Financial Review” of this MD&A under the heading “Change in Value of Exchangeable Interest Liability”). Net income for the period from discontinued operations, net of tax, was nil after the combined UMASH transactions, consisting of the sale of the Corporation’s controlling interest and the underlying real estate assets, were completed in June 2020, compared to net loss of \$2.5 million for the same period in 2019.

The Corporation generated cash available for distribution of Cdn\$12.7 million, representing an increase of Cdn\$7.4 million or 140.4% from Cdn\$5.3 million for the same period in the prior year. Distributions per common share decreased between the periods by Cdn\$0.211 to Cdn\$0.070, while the payout ratio was 17.1% for this period compared to 165.3% for the three months ended September 30, 2019. For a reconciliation of the foregoing non-IFRS financial measures to the applicable IFRS measures, see Section 7 under the heading “Reconciliation of Non-IFRS Financial Measures.”

Selected Financial Information for the Nine Months Ended September 30, 2020 Compared to the Nine Months Ended September 30, 2019

For the nine months ended September 30, 2020, total revenue and other income from continuing operations was \$280.4 million, a decrease of 1.3% from \$284.1 million for the same period in 2019. Facility service revenue from continuing operations of \$256.7 million decreased by 9.6% from \$284.1 million for the same period in 2019, primarily due to a decline in case volume as a result of the COVID-19 pandemic which forced the Facilities to reduce their elective surgeries or temporarily cease operations in the second half of March and the month of April 2020. This was partly offset by the recognition of government stimulus income of \$23.6 million. EBITDA was \$67.3 million or 24.0% of total revenue and other income from continuing operations compared to \$41.6 million or 14.7% of total revenue and other income from continuing operations for the same period last year due to the prior year goodwill impairment charge as well as lower operating expenses, partly offset by lower total revenue and other income. Excluding the impact of transaction costs on the sale of controlling interest in UMASH and the prior year impairment charge, Adjusted EBITDA was \$67.7 million or 24.1% of total revenue and other income from continuing operations compared to \$63.6 million or 22.4% of total revenue and other income from continuing operations for the same period last year. Net income for the period from continuing operations was \$31.8 million compared to net income of \$28.9 million for the same period in 2019, with the increase mainly attributable to higher operating income, inclusive of the impact of the prior year goodwill impairment charge, partly offset by higher finance costs. Net loss for the period from discontinued operations, net of tax, was \$1.7 million compared to \$31.5 million for the same period in 2019, mainly due to the prior year \$29.5 million impairment charge on goodwill and other intangibles in the UMASH/RRIMH cash-generating unit.

The Corporation generated cash available for distribution of Cdn\$29.8 million, representing an increase of Cdn\$14.4 million or 93.5% from Cdn\$15.4 million for the same period in the prior year. Distributions per common share decreased between the years by Cdn\$0.634 to Cdn\$0.210, while the payout ratio was 21.9% for this period compared to 170.2% for the nine months ended September 30, 2019. For a reconciliation of the foregoing non-IFRS financial measures to the applicable IFRS measures, see Section 7 under the heading “Reconciliation of Non-IFRS Financial Measures.”

5. CONSOLIDATED OPERATING AND FINANCIAL REVIEW

Continuing Operations for the Three Months Ended September 30, 2020

The following table and discussion compare operating and financial results from continuing operations of the Corporation for the three months ended September 30, 2020 to the three months ended September 30, 2019.

<i>Unaudited</i>	Three Months Ended			
	September 30,			
<i>In thousands of U.S. dollars, except per share amounts</i>	2020	2019	\$ Change	% Change
Revenue and other income				
Facility service revenue	96,322	96,536	(214)	(0.2%)
Government stimulus income	2,491	-	2,491	100.0%
	98,813	96,536	2,277	2.4%
Operating expenses				
Salaries and benefits	28,795	27,800	995	3.6%

Revenue and Other Income

<i>Unaudited</i>	Three Months Ended September 30,			
<i>In thousands of U.S. dollars</i>	2020	2019	\$ Change	% Change
ASH	18,315	16,717	1,598	9.6%
OSH	18,050	19,968	(1,918)	(9.6%)
BHSH	23,771	22,753	1,018	4.5%
SFSH	28,977	27,545	1,432	5.2%
SCNC	1,791	1,925	(134)	(7.0%)
MFC Nueterra ASCs	7,909	7,628	281	3.7%
Total revenue and other income	98,813	96,536	2,277	2.4%

For the three months ended September 30, 2020, total revenue and other income increased from the same period in 2019 by \$2.3 million or 2.4%, while facility service revenue decreased by \$0.2 million or 0.2%. The increase was primarily attributable to the combined impact of case and payor mix (\$3.2 million), government stimulus income (\$2.5 million), and the temporary suspension of Medicare's 2% reimbursement reduction initiative (\$0.6 million), partly offset by the decline in case volume (\$3.9 million) mainly as a result of the COVID-19 pandemic affecting elective procedures at some Facilities.

Total surgical cases decreased by 3.5%, as outpatient cases decreased by 4.4% and inpatient cases decreased by 5.3%, although observation cases increased by 19.3%. MFC Nueterra ASCs and BHSH experienced the largest declines. Surgical case volume decline by payor compared to the same period last year came predominantly from Blue Cross/Blue Shield and Medicare, which decreased by 7.1% and 5.2%, respectively. Pain cases were down by 11.6% compared to the same period last year.

The above factors are reflected in each subsidiary's revenue as follows:

- ASH's revenue increased mainly due to average rate increases based partly on case mix from the relative growth in orthopedic cases and the recognition of government stimulus income, as well as higher surgical case volume.
- OSH's revenue decreased due to lower contractual recovery rates attributable to case mix with lower inpatient cases and higher outpatient cases compared to prior year, coupled with the impact of a decline in case volume.
- BHSH's revenue increased mainly due to case mix, in which orthopedic and neurology cases accounted for a larger portion of surgical volume, as well as the recognition of government stimulus income. This was partly offset by payor mix and lower surgical case volume.
- SFSH's revenue increased due to the recognition of government stimulus income, case mix as a result of the relative increase in spine surgical cases, and a decrease in bad debt due to fewer self-pay cases, partly offset by payor mix.
- SCNC's revenue decreased mainly due to lower volume related to the COVID-19 pandemic and payor mix more heavily weighted to Medicare cases during the quarter, partly offset by the recognition of government stimulus income.
- MFC Nueterra ASCs' revenue increased mainly due to the shift in case and payor mix, and the recognition of government stimulus income. This was mostly offset by lower case volume related to the COVID-19 pandemic.

Operating Expenses

For the three months ended September 30, 2020, operating expenses, including salaries and benefits, drugs and supplies, general and administrative expenses, impairment of goodwill, depreciation of property and equipment, depreciation of right-of-use assets, and amortization of other intangibles (“operating expenses”), decreased by \$22.2 million or 21.5% from the same period in the prior year to \$81.2 million, mainly due to the prior year goodwill impairment charge of \$22.0 million. As a percentage of total revenue and other income, operating expenses decreased to 82.2% from 107.2% in the same period a year earlier.

<i>Unaudited</i>	Three Months Ended September 30,					
<i>In thousands of U.S. dollars</i>	2020	Percentage of Revenue	2019	Percentage of Revenue	\$ Change	% Change
ASH	13,548	74.0%	13,661	81.7%	(113)	(0.8%)
OSH	16,788	93.0%	17,398	87.1%	(610)	(3.5%)
BHSH	17,788	74.8%	17,790	78.2%	(2)	(0.0%)
SFSH	20,365	70.3%	19,759	71.7%	606	3.1%
SCNC	1,586	88.6%	1,505	78.2%	81	5.4%
MFC Nueterra ASCs	6,924	87.5%	6,730	88.2%	194	2.9%
Corporate	4,242	n/a	26,632	n/a	(22,390)	(84.1%)
Operating expenses	81,241	82.2%	103,475	107.2%	(22,234)	(21.5%)

Consolidated salaries and benefits increased by \$1.0 million or 3.6%, primarily due to Facilities electing to maintain staff hours rather than reduce them in light of the decline in case volume (\$0.8 million), and higher incentive pay (\$0.9 million), partly offset by urgent care staffing reductions at BHSH and closure of ASH urgent care in June 2020 (\$0.6 million). As a percentage of total revenue and other income, consolidated salaries and benefits increased to 29.1% from 28.8% a year earlier.

Consolidated drugs and supplies increased by \$1.2 million or 3.8%, primarily driven by case mix (\$2.9 million), in which higher orthopedic, neurology and pain surgeries increased the implant costs, and increased COVID-19 related medical supplies (\$0.6 million), partly offset by lower case volume and implant cost savings at OSH (\$2.2 million). As a percentage of total revenue and other income, the consolidated cost of drugs and supplies increased to 33.1% from 32.6% a year earlier.

Consolidated G&A decreased by \$2.1 million or 13.9%. The decrease was due to several factors, including a decrease in losses related to lease terminations (\$0.6 million), lower physician recruitment and guarantee costs (\$0.3 million), a gain on the sale of Two Rivers Surgical Center (\$0.2 million), reduction in professional services, marketing, and other contracted services (\$0.2 million), and lower administrative and other various expenses (\$0.7 million). As a percentage of total revenue and other income, consolidated G&A decreased to 12.9% from 15.4% a year earlier.

In the prior year period, the Corporation recorded a non-cash goodwill impairment charge of \$22.0 million relating to the MFC Nueterra ASCs cash-generating unit (refer to Section 13 “Critical Accounting Judgements and Estimates” of this MD&A under the heading “Impairment of Non-Financial Assets”).

Consolidated depreciation of property and equipment remained relatively consistent year over year. As a percentage of total revenue and other income, consolidated depreciation of property and equipment remained consistent at 2.5%.

Consolidated depreciation of right-of-use assets increased by \$0.3 million or 12.3%, due to new lease agreements and extensions of existing agreements. As a percentage of total revenue and other income, consolidated depreciation of right-of-use assets increased to 2.5% from 2.3% a year earlier.

Consolidated amortization of other intangibles decreased by \$0.6 million or 23.3%, mainly due to certain intangibles being fully amortized, as well as the sale of Central Arkansas Surgical Center in December 2019. As

a percentage of total revenue and other income, consolidated amortization of other intangibles decreased to 2.1% from 2.8% a year earlier.

Income from Operations

Consolidated income from operations for the three months ended September 30, 2020 of \$17.6 million was \$24.5 million or 353.2% higher than consolidated loss from operations of \$6.9 million. It represents 17.8% of revenue and other income, compared to negative 7.2% in the same period in 2019. The increase is mainly the result of the prior year impairment charge of \$22.0 million, and higher income from operations at ASH, BSHS and SFSH.

<i>Unaudited</i>	Three Months Ended September 30,					
<i>In thousands of U.S. dollars</i>	2020	Percentage of Revenue	2019	Percentage of Revenue	\$ Change	% Change
ASH	4,767	26.0%	3,056	18.3%	1,711	56.0%
OSH	1,262	7.0%	2,570	12.9%	(1,308)	(50.9%)
BSHS	5,983	25.2%	4,963	21.8%	1,020	20.6%
SFSH	8,612	29.7%	7,786	28.3%	826	10.6%
SCNC	205	11.4%	420	21.8%	(215)	(51.2%)
MFC Nueterra ASCs	985	12.5%	898	11.8%	87	9.7%
Corporate	(4,242)	n/a	(26,632)	n/a	22,390	84.1%
Income (loss) from operations	17,572	17.8%	(6,939)	(7.2%)	24,511	353.2%

Finance Costs (Income)

Change in Value of Convertible Debentures

On December 31, 2019, the Corporation repaid in full the principal and interest in respect of the convertible debentures upon maturity.

Prior to repayment, the convertible debentures were recorded as a financial liability at fair value and re-measured at each reporting date and the changes in fair value were included in net income and comprehensive income for the respective periods. Changes in the recorded value of the convertible debentures were driven by the changes in the market price of the Corporation's convertible debentures and fluctuations in the value of the Canadian dollar against the U.S. dollar.

The following table provides a calculation of the change in fair value of convertible debentures for the comparative reporting periods only:

<i>In thousands of U.S. dollars, except as indicated otherwise</i>	September 30, 2019 <i>Unaudited</i>	June 30, 2019 <i>Unaudited</i>	Change
Face value of convertible debentures outstanding	C\$41,743	C\$41,743	C\$ -
Closing price of convertible debentures outstanding	C\$100.00	C\$100.99	(C\$0.99)
Closing exchange rate of U.S. dollar to Canadian dollar	\$1.3242	\$1.3093	\$0.0149
Market value of convertible debentures outstanding	31,523	32,198	(675)

Change in Value of Exchangeable Interest Liability

The liability for the exchangeable interest is recorded at fair value, and re-measured at each reporting date, and the changes in fair value are included in net income and comprehensive income for the respective periods. Changes in the recorded value of the exchangeable interest liability between the reporting periods are attributable to the (i) changes in the number of common shares to be issued for the exchangeable interest liability, which are driven by the distributions to the non-controlling interest during the twelve-month period ending on the reporting date, (ii) changes in the market price of the Corporation's common shares, and (iii) fluctuations of the value of the Canadian dollar against the U.S. dollar.

The following table provides a calculation of the change in value of exchangeable interest liability for the reporting periods:

<i>In thousands of U.S. dollars, except as indicated otherwise</i>	September 30,	June 30,	Change	September 30,	June 30,	Change
	2020 <i>Unaudited</i>	2020 <i>Unaudited</i>		2019 <i>Unaudited</i>	2019 <i>Unaudited</i>	
Number of common shares to be issued for exchangeable interest liability	6,250,969	6,421,383	(170,414)	6,033,881	6,002,516	31,365
Closing price of the Corporation's common shares	C\$4.37	C\$4.34	C\$0.03	C\$8.03	C\$12.39	(C\$4.36)
Closing exchange rate of U.S. dollar to Canadian dollar	\$1.3322	\$1.3576	(\$0.0254)	\$1.3242	\$1.3093	\$0.0149
Exchangeable interest liability	20,505	20,528	(23)	36,590	56,802	(20,212)

Interest on Exchangeable Interest Liability

Interest expense on the exchangeable interest liability increased by \$0.5 million, which was primarily driven by the variation in distributions from the Facilities between the reporting periods.

Interest Expense

Interest expense, net of interest income, from continuing operations increased by \$0.3 million mainly due to lower interest income at the corporate level, higher interest expense on lease liabilities and increased stand-by fees, partly offset by lower interest expense as a result of the repayment of the convertible debentures on December 31, 2019 and reduced interest on the credit facility.

Foreign Currency

The Corporation's reporting currency is U.S. dollars; however, certain public company expenses and payments to holders of common shares and convertible debentures, until their maturity on December 31, 2019, are made in Canadian dollars. Foreign currency loss decreased by \$0.1 million compared to the same period in 2019, due to the relative change in foreign exchange rates.

Share of Equity Loss in Associates

The Corporation's share of equity loss in associates accounted for using the equity method increased by \$0.7 million compared to the same period in 2019. The increase is mainly due to the Corporation's share of the net loss from UMASH and St. Luke's Surgery Center of Chesterfield, LLC ("St. Luke's"), which is jointly owned through the MFC Nueterra Partnership and began its operations in September 2020.

Income Tax

Current and deferred tax components of the income tax expense from continuing operations for the reporting periods are as follows:

<i>Unaudited</i>	Three Months Ended September 30,				
	<i>In thousands of U.S. dollars</i>	2020	2019	\$ Change	% Change
Current income tax expense (recovery)		(2,098)	107	(2,205)	(2,060.7%)
Deferred income tax expense		4,884	1,620	3,264	201.5%
Income tax expense		2,786	1,727	1,059	61.3%

The decrease in current income tax expense versus last year was primarily due to refundable U.S. current taxes stemming from measures introduced as part of the CARES Act, offset partly by the impact of higher Facility income.

The increase in deferred income tax expense versus prior year was mainly due to the increased deductibility of interest expense previously deferred stemming from the CARES Act.

Net Income from Continuing Operations

The \$1.1 million increase in net income for the period from continuing operations was mainly attributable to higher income from operations, which benefited on a year-over-year basis from the prior year impairment charge, partly offset by higher finance costs, including the change in the value of exchangeable interest liability versus the prior year (refer to Section 5 “Consolidated Operating and Financial Review” of this MD&A under the heading “Change in Value of Exchangeable Interest Liability”) and higher income tax expense.

EBITDA

EBITDA of \$24.6 million increased by \$24.2 million from \$0.4 million recorded a year earlier, representing 24.8% of revenue and other income compared to 0.4% a year earlier, mainly driven by the goodwill impairment charge in the prior year and improved EBITDA at the majority of the Facilities. For a reconciliation of EBITDA to an applicable IFRS measure, see Section 5 under “Reconciliation of net income for the period from continuing operations to EBITDA and Adjusted EBITDA.”

Adjusted EBITDA

Adjusted EBITDA of \$24.6 million for the three months ended September 30, 2020 increased from \$22.4 million in the same period a year earlier, representing 24.8% of revenue and other income, versus 23.2% in prior year. For a reconciliation of EBITDA to an applicable IFRS measure, see Section 5 under “Reconciliation of net income for the period from continuing operations to EBITDA and Adjusted EBITDA.”

Continuing Operations for the Nine Months Ended September 30, 2020

The following table and discussion compare operating and financial results from continuing operations of the Corporation for the nine months ended September 30, 2020 to the nine months ended September 30, 2019.

<i>Unaudited</i>	Nine Months Ended			
	September 30,			
<i>In thousands of U.S. dollars, except per share amounts</i>	2020	2019	\$ Change	% Change

Revenue and Other Income

<i>Unaudited</i> <i>In thousands of U.S. dollars</i>	Nine Months Ended September 30,			
	2020	2019	\$ Change	% Change
ASH	53,789	50,121	3,668	7.3%
OSH	54,433	54,192	241	0.4%
BHSH	64,886	68,476	(3,590)	(5.2%)
SFSH	81,977	81,230	747	0.9%
SCNC	4,820	5,628	(808)	(14.4%)
MFC Nueterra ASCs	20,474	24,502	(4,028)	(16.4%)
Total revenue and other income	280,379	284,149	(3,770)	(1.3%)

For the nine months ended September 30, 2020, total revenue and other income decreased from the same period in 2019 by \$3.8 million or 1.3%. Facility service revenue decreased by \$27.4 million or 9.6%. The decrease in facility service revenue was primarily attributable to the decline in case volume (\$39.1 million) as a result of the COVID-19 pandemic, stemming from the reduction or discontinuation of elective procedures and in some cases temporary closure of operations from the second half of March to the first half of May 2020. This was partly offset by government stimulus income (\$23.6 million), the combined impact of case and payor mix (\$9.8 million), an increase from changes in the timing for a certain payor's withholdings and related rebates at ASH (\$1.3 million), and the temporary suspension of Medicare's 2% reimbursement reduction initiative (\$1.0 million).

Total surgical cases decreased by 16.5%, as outpatient cases decreased by 19.1%, inpatient cases decreased by 10.4%, and observation cases decreased by 2.4%. MFC Nueterra ASCs, SCNC, SFSH, and BHSH experienced the largest declines. Surgical case volume decline by payor over the same period last year came predominantly from Blue Cross/Blue Shield and Medicare, which decreased by 19.3% and 18.1%, respectively. Pain cases were down by 13.9% compared to the same period last year.

The above factors are reflected in each subsidiary's revenue as follows:

- ASH's revenue increased mainly due to government stimulus income, a payor which refunded its 2019 withholdings rebate in the first quarter of 2020 and suspended monthly withholdings due to the COVID-19 pandemic, and payor rate increases, partly offset by lower case volume as a result of the pandemic.
- OSH's revenue increased due to government stimulus income, partly offset by the lower case volume as a result of the COVID-19 pandemic, a shift in case mix with less inpatient cases, and a shift in payor mix with lower average revenue per case on larger surgical cases.
- BHSH's revenue decreased due to lower case volume resulting from the discontinuation of elective cases from the second half of March 2020 to April 2020 as a result of the COVID-19 pandemic, as well as the impact of payor mix and increased bad debt expense, which was partly offset by government stimulus income, case mix and higher imaging revenue.
- SFSH's revenue increased due to government stimulus income, case mix with a higher portion of spine procedures, payor mix with a higher percentage of commercial payor cases, and a decrease in bad debt expenses. This was partly offset by a decrease in case volume from discontinuing elective cases in April 2020 and the first half of May 2020 as a result of the COVID-19 pandemic.
- SCNC's revenue decreased mainly due to lower case volume as a result of the COVID-19 pandemic, partly offset by government stimulus income, as well as favourable case mix because of increased orthopedic cases.
- MFC Nueterra ASCs' revenue decreased mainly due to the volume impact of the COVID-19 pandemic, as three ASCs located in Pennsylvania, Nebraska, and Ohio were closed starting in the second half of March

2020 until the end of April 2020 as part of the state mandates on elective surgery. This decrease was partly offset by case mix with a higher portion of neurology and orthopedics cases, and government stimulus income.

Operating Expenses

For the nine months ended September 30, 2020, operating expenses decreased by \$31.3 million or 11.8% from the same period in the prior year to \$234.2 million. As a percentage of total revenue and other income, operating expenses decreased to 83.5% from 93.4% in the same period a year earlier.

<i>Unaudited</i>	Nine Months Ended September 30,					
<i>In thousands of U.S. dollars</i>	2020	Percentage of Revenue	2019	Percentage of Revenue	\$ Change	% Change
ASH	39,107	72.7%	40,790	81.4%	(1,683)	(4.1%)
OSH	50,453	92.7%	50,290	92.8%	163	0.3%
BHSH	50,347	77.6%	53,050	77.5%	(2,703)	(5.1%)
SFSH	58,267	71.1%	57,654	71.0%	613	1.1%
SCNC	4,454	92.4%	4,815	85.6%	(361)	(7.5%)
MFC Nueterra ASCs	17,999	87.9%	21,417	87.4%	(3,418)	(16.0%)
Corporate	13,559	n/a	37,464	n/a	(23,905)	(63.8%)
Operating expenses	234,186	83.5%	265,480	93.4%	(31,294)	(11.8%)

Consolidated salaries and benefits decreased by \$0.1 million or 0.1%, primarily due to staffing changes as a result of lower case volume attributable to the impact of COVID-19 (\$2.2 million), urgent care staffing reductions (\$1.2 million), and the separation costs for the former Chief Financial Officer in the prior year (\$1.1 million), partly offset by annual increases and staff hour guarantees (facilitated by the PPP program) for both clinical and non-clinical wages and salaries (\$2.5 million), higher incentive pay (\$0.7 million), and higher benefit costs from increased utilization (\$0.8 million). As a percentage of total revenue and other income, consolidated salaries and benefits increased to 30.0% from 29.7% a year earlier.

Consolidated drugs and supplies decreased by \$6.2 million or 6.8%, primarily driven by lower case volume (\$8.0 million) and implant cost savings at OSH (\$2.3 million), partly offset by case mix with a greater portion of spine and orthopedics cases at certain Facilities (\$4.1 million). As a percentage of total revenue and other income, the consolidated cost of drugs and supplies decreased to 30.7% from 32.5% a year earlier.

Consolidated G&A decreased by \$1.0 million or 2.4%. The decrease in G&A was mainly attributable to a decrease in marketing and contracted services (\$1.3 million), a decrease in various administrative and maintenance expenses (\$0.8 million), a decrease in losses related to lease terminations (\$0.6 million), and a gain on the sale of Two Rivers Surgical Center (\$0.2 million), partly offset by a gain from a legal settlement at SFSH in prior year (\$0.9 million), transaction costs incurred on the sale of the controlling interest in UMASH (\$0.5 million), and an impairment charge on fixed assets and right-of-use asset recorded upon shutdown of the ASH urgent care operations in Sherwood, Arkansas (\$0.4 million). As a percentage of total revenue and other income, consolidated G&A decreased to 15.3% from 15.5% a year earlier.

In the prior year period, the Corporation recorded a non-cash goodwill impairment charge of \$22.0 million relating to the MFC Nueterra ASCs cash-generating unit (refer to Section 13 “Critical Accounting Judgements and Estimates” of this MD&A under the heading “Impairment of Non-Financial Assets”).

Consolidated depreciation of property and equipment decreased by \$0.5 million or 6.0%, primarily due to certain assets being fully depreciated, as well as the sale of Central Arkansas Surgical Center in December 2019, partly offset by the acquisition of fixed assets. As a percentage of total revenue and other income, consolidated depreciation of property and equipment decreased to 2.6% from 2.8% a year earlier.

Consolidated depreciation of right-of-use assets increased by \$0.7 million or 10.4%, due to the addition of new lease agreements and extension of existing agreements, partly offset by termination and modification of certain

leases, including the sale of Central Arkansas Surgical Center in December 2019. As a percentage of total revenue and other income, consolidated depreciation of right-of-use assets increased to 2.7% from 2.4% a year earlier.

Consolidated amortization of other intangibles decreased by \$2.2 million or 26.1%, mainly due to certain intangibles being fully amortized, as well as the sale of Central Arkansas Surgical Center in December 2019. As a percentage of total revenue and other income, consolidated amortization of other intangibles decreased to 2.2% from 2.9% a year earlier.

Income from Operations

Consolidated income from operations for the nine months ended September 30, 2020 of \$46.2 million was \$27.5 million or 147.4% higher than consolidated income from operations of \$18.7 million, recorded in the same period a year earlier, representing 16.5% of revenue and other income, compared to 6.6% in the same period in 2019. The increase is mainly due to the combination of higher prior year corporate level costs resulting from the goodwill impairment charge and separation costs for the former Chief Financial Officer, and higher income in the current year from operations at ASH but declines at most other Facilities, inclusive of the negative impact of the COVID-19 pandemic and the favourable impact of the government stimulus income.

<i>Unaudited</i>	Nine Months Ended September 30,					
<i>In thousands of U.S. dollars</i>	2020	Percentage of Revenue	2019	Percentage of Revenue	\$ Change	% Change
ASH	14,682	27.3%	9,331	18.6%	5,351	57.3%

Finance Costs

Change in Value of Convertible Debentures

On December 31, 2019, the Corporation repaid in full the principal and interest in respect of the convertible debentures upon maturity.

Prior to repayment, the convertible debentures were recorded as a financial liability at fair value and re-measured at each reporting date and the changes in fair value were included in net income and comprehensive income for the respective periods. Changes in the recorded value of the convertible debentures were driven by the changes in the market price of the Corporation's convertible debentures and fluctuations in the value of the Canadian dollar against the U.S. dollar.

The following table provides a calculation of the change in fair value of convertible debentures for the comparative reporting periods only:

<i>In thousands of U.S. dollars, except as indicated otherwise</i>	September 30, 2019 <i>Unaudited</i>	December 31, 2018	Change
Face value of convertible debentures outstanding	C\$41,743	C\$41,743	C\$ -
Closing price of convertible debentures outstanding	C\$100.00	C\$100.10	(C\$0.10)
Closing exchange rate of U.S. dollar to Canadian dollar	\$1.3242	\$1.3641	(\$0.0399)
Market value of convertible debentures outstanding	31,523	30,632	891

Change in Value of Exchangeable Interest Liability

The liability for the exchangeable interest is recorded at fair value, and re-measured at each reporting date, and the changes in fair value are included in net income and comprehensive income for the respective periods. Changes in the recorded value of the exchangeable interest liability between the reporting periods are attributable to the (i) changes in the number of common shares to be issued for the exchangeable interest liability, which are driven by the distributions to the non-controlling interest during the twelve-month period ending on the reporting date, (ii) changes in the market price of the Corporation's common shares, and (iii) fluctuations of the value of the Canadian dollar against the U.S. dollar.

The following table provides a calculation of the change in value of exchangeable interest liability for the reporting periods:

<i>In thousands of U.S. dollars, except as indicated otherwise</i>	September 30, 2020 <i>Unaudited</i>	December 31, 2019	Change	September 30, 2019 <i>Unaudited</i>	December 31, 2018	Change
Number of common shares to be issued for exchangeable interest liability	6,250,969	5,955,277	295,692	6,033,881	5,970,862	63,019
Closing price of the Corporation's common shares	C\$4.37	C\$4.80	(C\$0.43)	C\$8.03	C\$15.04	(C\$7.01)
Closing exchange rate of U.S. dollar to Canadian dollar	\$1.3322	\$1.2990	\$0.0332	\$1.3242	\$1.3641	(\$0.0399)
Exchangeable interest liability	20,505	22,006	(1,501)	36,590	65,832	(29,242)
Exercise of exchangeable rights by non-controlling interests			-			475
Change in value of exchangeable interest liability			(1,501)			(28,767)

Interest on Exchangeable Interest Liability

Interest expense on the exchangeable interest liability decreased by \$0.6 million compared to the same period in prior year, which was primarily driven by the variation in distributions from the Facilities between the reporting periods.

Interest Expense

Interest expense, net of interest income, from continuing operations decreased by \$1.4 million mainly due to the repayment of the convertible debentures on December 31, 2019, lower credit facility interest at the corporate level due to a lower outstanding balance and interest rate, offset partly by lower interest income at the corporate level.

Impairment Gain on Loan Receivable

Impairment gain on loan receivable totalled \$0.7 million for the period, as a result of revaluating the impairment loss allowance reserved on the loan receivable from UMASH. Refer to Section 13 under the heading "Allowance for Loan Receivable" for a discussion on the calculation methodology.

Foreign Currency

The Corporation's reporting currency is U.S. dollars; however, certain public company expenses and payments to holders of common shares and convertible debentures, until their maturity on December 31, 2019, are made in Canadian dollars. Foreign currency loss increased by \$0.3 million compared to the same period in 2019, due to the relative change in foreign exchange rates.

Share of Equity Loss in Associates

The Corporation's share of equity loss in associates accounted for using the equity method increased by \$1.5 million compared to the same period in 2019. The increase is mainly due to the Corporation's share of the net loss from UMASH for the period subsequent to the Corporation's sale of its controlling interest in February 2020 and from St. Luke's.

Income Tax

Current and deferred tax components of the income tax expense from continuing operations for the reporting periods are as follows:

<i>Unaudited</i> <i>In thousands of U.S. dollars</i>	Nine Months Ended September 30,			
	2020	2019	\$ Change	% Change
Current income tax expense (recovery)	(3,568)	2,938	(6,506)	(221.4%)
Deferred income tax expense	9,257	3,596	5,661	157.4%
Income tax expense	5,689	6,534	(845)	(12.9%)

The decrease in current income tax expense versus last year was primarily due to refundable U.S. current taxes stemming from measures introduced as part of the CARES Act of \$5.1 million, as described below, offset partly by the impact of higher Facility income. The increase in deferred income tax expense versus prior year was mainly due to increased deductibility of interest expense previously deferred stemming from the CARES Act, as well as changes in timing differences and the impact of the change in exchangeable interest liability.

The CARES Act provides tax relief with a number of measures. It includes a temporary change to Section 172 of the *U.S. Internal Revenue Code of 1986*, as amended, (the "Code") such that net operating losses ("NOL") can be carried back five years. Based on the expected application of NOL carry backs generated in the 2019 and 2020 tax years, the Corporation has recorded refunds of approximately \$5.1 million as a result of the change due to the CARES Act.

The anticipated NOL for 2019 and 2020 stems primarily from temporary changes under the CARES Act to two other provisions under the Code. The business interest deduction limit under Section 163(j) of the Code is increased from 30% to 50% of a taxpayer's adjusted taxable income for tax years beginning in 2019 and 2020. As a result, the Corporation expects to realize additional interest expense deductions with a current tax impact of approximately \$7.5 million. The other significant change is that the CARES Act clarifies that Qualified Improvement Property is eligible for bonus depreciation (i.e., 100% expensing) under Section 168(k) of the Code, for which the Corporation estimates current tax savings of approximately \$0.8 million.

Net Income from Continuing Operations

The \$2.9 million increase in net income for the period from continuing operations was mainly attributable to higher income from operations, partly offset by higher finance costs, including the change in the value of exchangeable interest liability versus the prior year (refer to Section 5 "Consolidated Operating and Financial Review" of this MD&A under the heading "Change in Value of Exchangeable Interest Liability").

EBITDA

EBITDA of \$67.3 million increased by \$25.7 million from \$41.6 million recorded a year earlier, representing 24.0% of revenue and other income compared to 14.7% a year earlier, mainly driven by the impairment charge in the prior year and an overall increase at Facilities driven by ASH, as the negative impact of COVID-19 was offset by the government stimulus income. For a reconciliation of EBITDA to an applicable IFRS measure, see Section 5 under “Reconciliation of net income for the period from continuing operations to EBITDA and Adjusted EBITDA.”

Adjusted EBITDA

Adjusted EBITDA of \$67.7 million for the nine months ended September 30, 2020 increased from \$63.6 million in the same period a year earlier, representing 24.1% of revenue and other income, versus 22.4% prior year. For a reconciliation of EBITDA to an applicable IFRS measure, see Section 5 under “Reconciliation of net income for the period from continuing operations to EBITDA and Adjusted EBITDA.”

6. QUARTERLY OPERATING AND FINANCIAL RESULTS

Summary of Quarterly Operating and Financial Results from Continuing Operations

<i>Unaudited</i>	2020			2019				2018

⁽¹⁾ Non-IFRS financial measure. Please refer to Section 2 under the heading "Non-IFRS Financial Measures" for a discussion of such measures.

During the last eight quarters, the following items have had a significant impact on the Corporation's financial results:

- Facility service revenue varies directly in relation to the number of cases performed as well as to the type of cases performed and the payor. For example, facility service revenue for orthopedic cases will typically be higher than ear, nose and throat cases and cases funded by Medicare or Medicaid will be

lower than those paid for by private insurance. Changes in case volumes, case mix and payor mix are normal and expected due to the nature of the Corporation's business. Surgical cases are mainly elective procedures and the volume of cases performed in any given period are subject to medical necessity and patient and physician preferences in scheduling (e.g., work schedules and vacations). The Corporation generally records higher revenue in the fourth quarter as many patients tend to seek medical procedures at the end of the year, primarily as a result of their inability to carry over unused insurance benefits into the following calendar year.

- The COVID-19 outbreak began to impact the Corporation's and Facilities' operations in the latter half of March 2020, with impacts of varying severity within the communities and states that the Facilities serve. All Facilities were impacted by the pandemic as elective cases were restricted, either voluntarily or by U.S. government mandate. Both such restrictions were lifted by mid-May 2020, but the pandemic continues to impact case volume across the Facilities, and there is no certainty that similar restrictions will not be re-instated.
- As part of the CARES Act in response to the COVID-19 pandemic, the Facilities received financial assistance and recorded some of the funds as government stimulus income during 2020. There is no certainty that such programs will be extended or replaced if the pandemic continues.
- The changes in operating expenses are generally consistent with fluctuations in case volumes and case mix. In addition, operating expenses have been impacted by costs related to the establishment of an accountable care organization by SFSH as well as the entering by SFSH into a management agreement for the orthopedic service line (refer to Section 12 of this MD&A under heading "Related Party Transactions").
- In addition, revenue and operating expenses have been impacted by sales of assets and controlling interests in 2019 and 2020. In September 2020, the Corporation sold all of its controlling ownership interest in Two Rivers Surgical Center, and recorded a gain on the sale.
- In June 2020, the ASH urgent care site located in Sherwood, Arkansas shut down its operations. The Corporation recorded an impairment of property and equipment as well as the right-of-use asset as a result of this shutdown.
- Due to the underperformance at certain MFC Nueterra ASCs, management assessed and recorded an impairment of goodwill in 2019.
- The changes in the recorded value of the convertible debentures were driven by the changes in the market price of the Corporation's convertible debentures and fluctuations in the value of the Canadian dollar against the U.S. dollar. On December 31, 2019, the Corporation repaid in full the principal and interest in respect of the convertible debentures upon maturity.
- The changes in the recorded value of the exchangeable interest liability have been driven by (i) the changes in the number of common shares issuable for the exchangeable interest liability, which are in turn driven by the distributions to the non-controlling interest during the twelve-month period ending on the reporting date, (ii) the changes in the market price of the Corporation's common shares, and (iii) the fluctuations of the value of the Canadian dollar against the U.S. dollar. During 2019 and 2020, changes in the market price of the Corporation's common shares mainly drove the fluctuations in the change in value of exchangeable interest liability.
- The fluctuations in interest expense on the exchangeable interest liability are due to the variation in distributions from the Facilities between the reporting periods.
- The fluctuations in foreign currency have been driven by the movements of exchange rate of the Canadian dollar in relation to U.S. dollar.

- Fluctuations in current income taxes have been driven by the changes in operating performance of the Facilities, the deductibility of corporate expenses, intercompany interest expense deductions and taxable (deductible) foreign exchange gains (losses). Fluctuations in deferred income taxes have been driven primarily by the changes in the exchangeable interest liability and Canadian cumulative tax operating loss carryforwards, along with the impact of U.S. tax reform pursuant to the recent U.S. federal tax law changes.

7. RECONCILIATION OF NON-IFRS FINANCIAL MEASURES

The following table presents reconciliation of cash available for distribution to cash provided by operating activities:

<i>Unaudited</i> In thousands of U.S. dollars, except as indicated otherwise		Three Months Ended September 30,		Nine Months Ended September 30,	
		2020 \$	2019 \$	2020 \$	2019 \$
CASH PROVIDED BY OPERATING ACTIVITIES	USD	24,125	19,111	63,596	58,823
Non-controlling interest in cash flows of the Facilities ⁽¹⁾		(9,794)	(9,252)	(26,315)	(24,331)
Interest expense on exchangeable interest liability ⁽²⁾		2,061	1,515	4,654	5,251
Payment of lease liabilities ⁽³⁾		(3,109)	(2,821)	(9,178)	(8,599)
Maintenance capital expenditures ⁽⁴⁾		(814)	(255)	(2,572)	(1,640)
Difference between accrual-based amounts and actual cash flows related to interest and taxes ⁽⁵⁾		2,986	(1,096)	5,683	(2,885)
Change in non-cash operating working capital items ⁽⁶⁾		(4,422)	(1,244)	(8,414)	(9,721)
Share-based compensation ⁽⁷⁾		(82)	(97)	(231)	(287)
Repayment of non-revolving debt ⁽⁸⁾		(1,403)	(1,854)	(5,181)	(5,009)
CASH AVAILABLE FOR DISTRIBUTION	USD	9,548	4,007	22,042	11,602
	CDN	12,719	5,291	29,847	15,421
DISTRIBUTIONS	CDN	2,177	8,749	6,532	26,222
CASH AVAILABLE FOR DISTRIBUTION PER COMMON SHARE ⁽⁹⁾	CDN	\$0.409	\$0.170	\$0.960	\$0.496
TOTAL DISTRIBUTIONS PER COMMON SHARE ⁽⁹⁾	CDN	\$0.070	\$0.281	\$0.210	\$0.844
PAYOUT RATIO		17.1%	165.3%	21.9%	170.2%
Average exchange rate of Cdn\$ to US\$ for the period		1.3321	1.3204	1.3541	1.3292
Weighted average number of common shares outstanding		31,106,259	31,106,259	31,106,259	31,077,702

⁽¹⁾ Non-controlling interest in cash flows of the Facilities is deducted in determining cash available for distribution as distributions from the Facilities to the non-controlling interest holders are required to be made concurrently with distributions from the Facilities to the Corporation.

⁽²⁾ Interest expense on exchangeable interest liability represents a notional amount of interest expense deducted in the determination of net income and comprehensive income attributable to owners of the Corporation. It is added back to determine cash available for distribution as it is a non-cash charge and is not distributable to the holders of the non-controlling interest.

⁽³⁾ Payment of lease liabilities represents rent payments on principal portions of lease liabilities and is deducted in determining cash available for distribution as this is a cash item included in financing activities on cash flow statements.

⁽⁴⁾ Maintenance capital expenditures at the Facility level reflect expenditures incurred to maintain the current operating capacities of the Facilities and are deducted in the calculation of cash available for distribution.

⁽⁵⁾ Cash flows from operating activities, as presented in the Corporation's consolidated statements of cash flows, represent actual cash inflows and outflows, while calculation of cash available for distribution is based on the accrued amounts and, therefore, the difference between the accrual-based amounts and actual cash inflows and outflows related to interest, income and withholding taxes is included in the above table.

⁽⁶⁾ While changes in non-cash operating working capital are included in the calculation of cash provided by operating activities, they are not included in the calculation of cash available for distribution as they represent only temporary sources or uses of cash due to the differences in timing of recording revenue and corresponding expenses and actual receipts and outlays of cash. Such changes in non-cash operating working capital are financed from the available cash or credit facilities of the Facilities.

⁽⁷⁾ Share-based compensation expense represents a charge included in salaries and benefits in the period which does not have a cash impact until the underlying stock options vest. As a non-cash item, this expense is added back in the calculation of cash available for distribution.

⁽⁸⁾ Repayment of non-revolving debt at the Facility level reflects contractual obligations of the Facilities and is deducted in the calculation of cash available for distribution.

⁽⁹⁾ Calculated based on the weighted average number of common shares outstanding.

Cash available for distribution in the three months ended September 30, 2020 (Cdn\$12.7 million) increased by Cdn\$7.4 million compared to the cash available for distribution the same period last year (Cdn\$5.3 million). On a per common share basis, cash available for distribution of Cdn\$0.41 increased by Cdn\$0.24, or 141.2% from the same period last year of Cdn\$0.17. The distributions per common share of Cdn\$0.07 decreased by Cdn\$0.21, or 75.0% from the same period last year of Cdn\$0.28 resulting in a payout ratio of 17.1% as compared to a payout ratio of 165.3% in the same period in 2019.

Cash available for distribution in the nine months ended September 30, 2020 (Cdn\$29.8 million) increased by Cdn\$14.4 million compared to the cash available for distribution the same period last year (Cdn\$15.4 million). On a per common share basis, cash available for distribution of Cdn\$0.96 increased by Cdn\$0.46, or 92.0% from the same period last year of Cdn\$0.50. The distributions per common share of Cdn\$0.21 decreased by Cdn\$0.63, or 75.0% from the same period last year of Cdn\$0.84 resulting in a payout ratio of 21.9% as compared to a payout ratio of 170.2% in the same period in 2019.

The Corporation's cash available for distribution comes solely from the Facilities. The following table provides a reconciliation of cash generated at the Facility level to the Corporation's cash available for distribution:

<i>Unaudited</i> <i>In thousands of U.S. dollars</i>	Three Months Ended September 30,		Nine Months Ended September 30,	
	2020	2019	2020	2019
	\$	\$	\$	\$
Cash flows from the Facilities:				
Income before interest expense, depreciation and amortization	28,719	22,639	75,795	66,853
Debt service costs:				
Interest	(992)	(1,527)	(3,260)	(4,536)
Repayment of non-revolving debt	(1,403)	(1,854)	(5,181)	(5,009)
Maintenance capital expenditures	(814)	(255)	(2,572)	(1,640)
Payment of lease liabilities	(3,208)	(2,772)	(9,045)	(8,430)
Non-cash loss	(1,625)	(434)	(1,975)	(1,167)
Cash available for distribution at Facility level	20,677	15,797	53,762	46,071
Non-controlling interest in cash available for distribution at Facility level	(9,794)	(9,252)	(26,315)	(24,331)
Corporation's share of the cash available for distribution at Facility level	10,883	6,545	27,447	21,740
Corporate expenses	(2,411)	(1,623)	(6,273)	(4,815)
Share of equity loss in associates	(672)	-	(1,606)	(101)
Interest expense on convertible debentures	-	(469)	-	(1,382)
Interest on corporate credit facility	(351)	(704)	(1,624)	(2,270)
Recoveries of (provision for) current income taxes	2,099	258	4,098	(1,570)
Cash available for distribution	9,548	4,007	22,042	11,602

Compared to the three months ended September 30, 2019, the cash available for distribution in U.S. dollars for the same period this year increased by \$5.5 million or 138.3% mainly due to higher income from Facilities, higher income tax refunds, and lower corporate interest payments, partly offset by higher corporate expenses, and the equity loss in associates.

Compared to the nine months ended September 30, 2019, the cash available for distribution in U.S. dollars for the same period this year increased by \$10.4 million or 90.0% mainly due to higher income from Facilities, and lower corporate taxes and interest payments, partly offset by higher corporate expenses and the equity loss in associates.

The chart below shows the Corporation’s cash available for distribution, distributions and payout ratios for the last twelve quarters.

8. OUTLOOK

As noted in the cautionary language concerning forward-looking disclosures in Section 1 of this MD&A under the heading “Caution Concerning Forward-Looking Statements”, this section contains forward-looking statements including with respect to the overall impact of the COVID-19 pandemic, the U.S. and local economies, ongoing changes in the healthcare industry, management strategies of the Corporation, and U.S. tax reform. Such statements involve known and unknown risks, uncertainties and other factors outside of management’s control, including the risk factors set forth under the heading “Risk Factors” in the annual MD&A and the Corporation’s most recently filed annual information form, which could cause results to differ materially from those described or anticipated in the forward-looking statements.

The outlook for the Corporation is influenced by many inter-related factors including the recent ongoing COVID-19 pandemic, the economy, the healthcare industry, management strategies of the Corporation, and U.S. tax reform.

COVID-19

Since the outbreak of the COVID-19 pandemic, the landscape for healthcare industry has changed significantly. While the restrictions on elective procedures have been lifted in most of the states where the Facilities operate, it is uncertain whether the local state authorities will impose such restrictions again in the future. As the Facilities work to return to their normal operations, screening and testing procedures for COVID-19 impact the progress.

Management expects that the COVID-19 pandemic will continue to impact the Facilities’ operations and financial results. The duration and impact of the COVID-19 pandemic remains unknown, as is the efficacy of the U.S. government interventions, the Corporation’s business continuity plan and other mitigating measures. It is not possible to reliably estimate the length and severity of these developments and the impact on the financial results of the Corporation and Facilities in future periods.

The Economy

Management's expectations could be impacted by the general state of the U.S. economy, which is experiencing the influence of the ongoing COVID-19 pandemic. The strength of the local economies of the areas served by the Corporation's Facilities is an important factor in the Corporation's outlook.

Healthcare Industry

While impossible to currently quantify, the potential modification or replacement of the *Patient Protection and Affordable Care Act* ("PPACA"), demographic changes and growing healthcare costs present numerous challenges and opportunities, including:

- the challenge of continuing pressure on reimbursement levels from U.S. government-funded plans (Medicare, Medicaid and similar plans) and private insurance companies, combined with the increasing share of case volume that such plans represent;
- the opportunity for additional case volumes arising from ownership of, and participation in, accountable care organizations and the related challenge of payor mix shifting to Medicare plans;
- the opportunity arising from reimbursement incentives which reward healthcare entities that meet specified quality and operational goals and operate in the most efficient and cost-effective manner; and
- an increased demand for services provided by the Corporation's Facilities due to the increasing average age and life expectancy of the U.S. population, overall population growth and advances in science and technology.

The outcome of the recent U.S. election on November 3, 2020 could have potential implications on the healthcare industry, including but not limited to the government response to COVID-19 and potential modifications to the PPACA, which could result in changes to healthcare coverage including case volume and reimbursement rates. In addition, the outcome of the pending U.S. Supreme Court Case (*California v. Texas*) presents the same variables as the outcome of the election with respect to the PPACA.

Management Strategies

Management is committed to increasing shareholder value, primarily through continued organic growth at its current Facilities, including the leveraging of its existing network to create de novo ASCs, along with the acquisitions of new, accretive ASCs that are complementary to the Corporation's core business. In addition to accretive core acquisitions, management will also consider other medical ventures where the financial and operational metrics are strong and could enhance a more comprehensive and integrated delivery model.

In collaboration with local management and physicians, management will continue to differentiate and grow the Corporation's Facilities by:

- maintaining service lines of the highest quality;
- physician development, including continued recruitment and retention of physician investors and potential physician utilizers, based on community needs;
- expanding the complement of service offerings at the Facilities;
- in-market acquisitions of ancillary businesses (ASCs, imaging and urgent care services); and
- sharing and implementing best practices and cost reduction strategies, with emphasis on supply chain and implant costs.

Management continues to develop its acquisition pipeline and investigate accretive acquisition targets that meet the Corporation's acquisition criteria to include facilities with:

- accretion, with growth available from a local strong provider base, attractive demographics, and opportunities for operating enhancements;
- high quality and optimum clinical outcomes; and
- continued strong earnings and opportunity for growth.

Management will maintain its emphasis on continuation of these strategies, combined with a strong balance sheet, an experienced management team and continuing identification of suitable accretive opportunities to enhance the Corporation's operating performance.

U.S. Tax Reform

Management expects that it will be able to utilize carryforwards of disallowed current year interest expense deductions to future years. Pursuant to the *Tax Cuts and Jobs Act*, MFA's deductions attributable to the interest expense on the promissory note (the interest paid by MFA on all debt, including the MFA promissory note, less its interest income) will be limited to 30% of adjusted taxable income, which generally represents EBITDA for the next two years (2020-2021), versus earnings before interest and taxes thereafter (2022 and beyond). One of the tax relief measures under the CARES Act increases the limit from 30% to 50% of a taxpayer's adjusted taxable income for tax years beginning in 2019 and 2020. Any disallowed interest expense may be carried forward to future years. This limitation applies to newly issued loans as well as those originated before 2018. Moreover, other limitations on the deductibility of interest under U.S. federal income tax laws, potentially including limitations applicable to certain high-yield debt obligations, could apply under certain circumstances to defer and/or eliminate all or a portion of the interest deduction that MFA would otherwise be entitled to with respect to interest on such indebtedness.

9. LIQUIDITY AND CAPITAL RESOURCES

As noted in the cautionary language concerning forward-looking disclosures in Section 1 of this MD&A under the heading "Caution Concerning Forward-Looking Statements", this section contains forward-looking statements including with respect to the impact of COVID-19, cash flows and future contractual payments. Such statements involve known and unknown risks, uncertainties and other factors outside of management's control, including the risk factors set forth under the heading "Risk Factors" in the annual MD&A and the Corporation's most recently filed annual information form, which could cause results to differ materially from those described or anticipated in the forward-looking statements.

COVID-19

Broad economic factors resulting from the COVID-19 pandemic, including higher unemployment rates and reduced consumer spending, are impacting the Facilities' case mix, payor mix and patient volumes. Business closings and layoffs in the areas where Facilities operate may lead to increases in the uninsured and underinsured populations and adversely affect demand for Facilities' services, as well as the ability of patients to pay for services as rendered. Any deterioration in the collectability of patient accounts receivable will adversely affect cash flows and results of operations.

If general economic conditions continue to decline or remain uncertain for an extended period of time, the Corporation's and Facilities' liquidity, ability to meet debt covenants, and ability to repay outstanding debts may be impacted. Moreover, the current COVID-19 pandemic may cause disruption in the financial markets. These factors may affect the availability, terms or timing with which the Corporation and Facilities may obtain any additional funding.

Cash Balances

The Corporation's cash and cash equivalents balances are as follows:

<i>Unaudited</i> <i>In thousands of U.S. dollars</i>	September 30, 2020	December 31, 2019
Cash and cash equivalents at Facility level	57,750	10,397
Cash and cash equivalents at corporate level	25,696	21,589
Cash and cash equivalents	83,446	31,986

Cash Flow Activity

Cash Flow

<i>Unaudited</i> <i>In thousands of U.S. dollars</i>	Nine Months Ended September 30,			
	2020	2019	\$ Change	% Change
Cash provided by operating activities	63,596	58,823	4,773	8.1%
Cash provided by (used in) investing activities	20,579	(6,033)	26,612	441.1%
Cash used in financing activities	(32,662)	(51,640)	18,978	36.8%
Increase in cash and cash equivalents	51,513	1,150	50,363	4,379.4%
Effect of exchange rate fluctuations on cash balances held	(53)	247	(300)	(121.5%)
Cash and cash equivalents, beginning of the period	31,986	36,686	(4,700)	(12.8%)
Cash and cash equivalents, end of the period	83,446	38,083	45,363	119.1%

The Corporation expects to fund operations with cash derived from operating activities. Deficiencies arising from short-term working capital requirements and capital expenditures may be financed on a short-term basis with bank indebtedness, funds available from the corporate credit facility, as well as lines of credit at the Facilities level, or on a permanent basis with offerings of securities of the Corporation. Negative changes in the general state of the U.S. economy could affect the Corporation's liquidity by reducing cash generated from operating activities or by limiting access to short-term financing as a result of tightening credit markets.

Operating Activities and Working Capital

Cash from operating activities in the nine months ended September 30, 2020 increased by \$4.8 million compared to the same period in 2019, primarily due to higher income from the Facilities, partly offset by higher tax payments.

As at September 30, 2020, the Corporation had consolidated net working capital of \$54.1 million compared to \$71.5 million as at December 31, 2019. The change was due mainly to the decrease in assets held for sale and liabilities associated with assets held for sale, as a result of the sale of controlling interest in UMASH in February 2020 and of real estate assets in June 2020, as well as the payor advances and government stimulus funds repayable recognized in current liabilities, partly offset by the receipt by the Facilities of government stimulus funds and proceeds from the UMASH sale. The change was also driven by a decrease in accounts receivable and an increase in current portion of long-term debt, partially offset by a decrease in accounts payable from timing differences. The level of working capital, including financing required to cover any deficiencies, is dependent on the operating performance of the Facilities and fluctuates from period to period.

As at September 30, 2020, accounts receivable were \$53.4 million (December 31, 2019: \$66.5 million), accounts payable and accrued liabilities totaled \$39.8 million (December 31, 2019: \$41.4 million), total assets were \$472.0 million (December 31, 2019: \$470.5 million) and total long-term liabilities, excluding exchangeable interest liability, were \$169.0 million (December 31, 2019: \$189.9 million).

Investing Activities

The \$26.6 million increase in cash provided by investing activities for the nine months ended September 30, 2020 compared to the same period in 2019 was mostly due to the proceeds from the sale of controlling interests in UMASH (\$25.8 million) and in Two Rivers Surgical Center (\$1.0 million), and a decrease in purchases of property and equipment (\$4.5 million), partly offset by prior year proceeds from the sale of ownership interest in City Place Surgery Center to non-controlling interest (\$4.5 million).

Financing Activities

The \$19.0 million decrease in cash used in financing activities for the nine months ended September 30, 2020 was mainly due to the payor advances and government stimulus funds received in the current year (\$26.4 million) which are repayable, and a reduction in dividend distributions by the Corporation (\$15.4 million), and lower Facility distributions to non-controlling interest (\$3.0 million), partly offset by net repayments of credit facilities and other borrowings at both Facility and corporate levels (\$25.1 million).

The Facilities have available credit facilities in place in the aggregate amount of \$39.7 million, of which \$11.9 million was drawn as at September 30, 2020. The balances available under the credit facilities, combined with cash and cash equivalents as at September 30, 2020, are available to manage the Facilities' accounts receivable, supply inventory and other short-term cash requirements.

The partnership or operating agreements governing each of the respective Facilities do not permit the Corporation to access the assets of the Facilities to settle the liabilities of other subsidiaries of the Corporation, and the Facilities have no obligation to (and could not, without the approval of the holders of the non-controlling interest) take any steps to settle the liabilities of the Corporation or its other subsidiaries.

The Corporation has in place a \$150.0 million line of credit with a syndicate of three Canadian chartered banks which matures on August 31, 2023 ("credit facility"). The credit facility can be used for general corporate purposes, including working capital and capital expenditures, finance of acquisitions, and/or repurchase of the Corporation's common shares. As at September 30, 2020, \$58.8 million was drawn and remained outstanding for the credit facility. The proceeds drawn from the credit facility were primarily used for the acquisition of UMASH and its underlying property through RRIMH in 2016 (\$48.8 million), the acquisition of the MFC Nueterra ASCs in 2018 (\$20.0 million), and the repayment of the convertible debentures upon maturity in 2019 (\$16.0 million). The Corporation repaid \$26.0 million of its outstanding balance during the three months ended September 30, 2020. As at September 30, 2020, the Corporation was in compliance with all of its debt covenants.

Contractual Obligations

The mandatory repayments under the credit facilities and other contractual obligations and commitments including expected interest payments, on a non-discounted basis, as of September 30, 2020, are as follows:

<i>Unaudited</i> In thousands of U.S. dollars Contractual Obligations	Carrying values at September 30, 2020 \$	Future payments (including principal and interest)				
		Total \$	Less than 1 year \$	1-3 years \$	4-5 years \$	After 5 years \$
Dividends payable	1,634	1,634	1,634	-	-	-
Accounts payable	20,409	20,409	20,409	-	-	-
Accrued liabilities	19,408	19,408	19,408	-	-	-
Payor advances and government stimulus funds repayable	26,406	26,406	26,406	-	-	-
Corporate credit facility	58,800	62,475	1,154	61,321	-	-
Facilities' revolving credit facilities	11,907	12,047	12,047	-	-	-
Notes payable	52,570	58,962	13,119	15,652	9,552	20,639
Lease liabilities	66,326	81,949	12,032	21,258	16,424	32,235
Total contractual obligations	257,460	283,290	106,209	98,231	25,976	52,874

The Corporation anticipates renewing, extending, repaying or replacing its credit facilities which fall due over the next twelve months and expects that cash flows from operations and working capital will be adequate to meet future payments on other contractual obligations over the next twelve months.

10. SHARE CAPITAL AND DIVIDENDS

As noted in the cautionary language concerning forward-looking disclosures in Section 1 of this MD&A under the heading "Caution Concerning Forward-Looking Statements", this section contains forward-looking statements including with respect to the Corporation's expected payment of dividends. Such statements involve known and unknown risks, uncertainties and other factors outside of management's control, including the risk factors set forth under the heading "Risk Factors" in the annual MD&A and the Corporation's most recently filed annual information form, which could cause results to differ materially from those described or anticipated in the forward-looking statements.

The following table summarizes the outstanding number of stock options as of September 30, 2020:

Optionee	Number of Options Held	Exercise Price	Grant Date
Chief Executive Officer	450,000	C\$14.03	March 29, 2018
	350,000	C\$16.47	May 18, 2017
Chief Financial Officer	300,000	C\$12.79	June 24, 2019
Chief Development Officer	350,000	C\$21.15	September 19, 2016
Chief Operating Officer	50,000	C\$ 2.64	March 19, 2020
Former Chief Executive Officer	223,562	C\$17.24	May 1, 2016
Former Chief Financial Officer	221,344	C\$17.98	November 21, 2016
Total number of outstanding options	1,944,906		

Outstanding options (the "Options") vest after five years of employment. The Options must be exercised by the tenth anniversary of the respective grant dates, subject to blackout exceptions. As of September 30, 2020, 444,906 of the Options relating to Former Chief Executive Officer and Former Chief Financial Officer are vested.

As at September 30, 2020, the Corporation had 31,106,259 common shares outstanding.

Normal Course Issuer Bids

The Corporation's normal course issuer bid allowing the Corporation to repurchase up to 621,144 of its common shares was in effect from May 16, 2019 to May 15, 2020. During the nine months ended September 30, 2020 and nine months ended September 30, 2019, the Corporation did not repurchase any of its common shares. The Corporation did not renew its normal course issuer bid.

Dividends

Dividend declarations are determined based on periodic reviews of the Corporation's earnings, capital expenditures and related cash flows. Such declarations take into account that the cash generated in the period is to be distributed after considering (i) debt service obligations, (ii) other expense and tax obligations, (iii) reasonable reserves for working capital and capital expenditures, and (iv) financial flexibility. The Corporation has revised the distributions to a quarterly dividend at an annual rate of Cdn\$0.28 per common share. Cash distributions declared in the period from January 1, 2020 to September 30, 2020 totaled Cdn\$0.210 per common share. The first dividend payment under the new payout schedule was a prorated amount for a partial period from November 1, 2019 to December 31, 2019 and was paid on January 15, 2020. The first full quarterly dividend was paid on April 15, 2020.

Dividend Reinvestment and Share Purchase Plan

The Corporation has a Dividend Reinvestment and Share Purchase Plan which allows shareholders resident in Canada to automatically re-invest, in a cost-effective manner, the cash dividends on their common shares into additional common shares of the Corporation.

11. FINANCIAL INSTRUMENTS

Financial instruments held in the normal course of business included in the interim condensed consolidated balance sheet as at September 30, 2020 consist of cash and cash equivalents, accounts receivable, loan receivable, dividends payable, accounts payable, accrued liabilities, borrowings (including long-term debt and corporate credit facility) and exchangeable interest liability.

The gross carrying value of the loan receivable on initial recognition is revaluated and adjusted using the loss allowance reserved on the loan. The loss allowance is determined based on the lifetime expected credit loss model at each reporting date. The fair value of exchangeable interest liability is determined based on the closing trading price of the Corporation's common share price at each reporting period. The fair values of long-term debt (notes payable and term loans) are not significantly different than their carrying values, as these instruments bear interest at rates comparable to current market rates. The fair values of all other financial instruments of the Corporation, due to the short-term nature of these instruments, approximate their carrying values.

Foreign Exchange Risk

The Facilities derive revenue, incur expenses and make distributions to their owners, including the Corporation, in U.S. dollars. The Corporation pays dividends to common shareholders and incurs a portion of its expenses in Canadian dollars. The amounts of distributions from the Facilities to their owners, including the Corporation and non-controlling interest, are dependent on the results of the operations and cash flows generated by the Facilities in any particular period.

Strengthening of the Canadian dollar against the U.S. dollar negatively impacts currency translation differences with respect to the funds available for the Corporation's Canadian dollar denominated dividend and interest payments and expenses. A weakening Canadian currency in relation to U.S. currency has the opposite effect.

The graph below shows the movement of the monthly average exchange rates between Canadian and U.S. dollars since October 2015:

The Corporation may, from time to time, enter into foreign exchange forward contracts dependent upon actual or anticipated company performance and current market conditions. As of September 30, 2020, the Corporation did not hold any foreign exchange forward contracts.

Credit Risk

The substantial portion of the Corporation’s accounts receivable balance is with U.S. governmental payors and health insurance companies which are assessed as having a low risk of default and is consistent with the Facilities’ history with these payors. Management reviews reimbursement rates and aging of the accounts receivable to monitor its credit risk exposure. On an ongoing basis, management assesses the circumstances affecting the recoverability of its accounts receivable and adjusts allowances based on changes in those factors. Actual bad debts for a trailing period are compared with the allowance to support the estimate of recoverability. Considerations related to historical experience are also factored into the valuation of the current period accounts receivable.

From time to time, the Corporation may enter into foreign exchange forward contracts and may place excess funds for investment with certain financial institutions. Investment of excess funds is guided by the investment policy of the Corporation that, among other things, (i) prescribes the eligible types of investments and (ii) establishes limits on the amounts that can be invested with any one financial institution.

Interest Rate Risk

The Corporation and the Facilities are exposed to interest rate fluctuations which can impact their borrowing costs. The Facilities use floating rate debt facilities for operating lines of credit that fund short-term working capital needs and use fixed rate debt facilities to fund investments and capital expenditures.

Share Price Risk

The Corporation’s exchangeable interest liability is measured on quoted market prices of its common shares in active markets and, therefore, the Corporation is exposed to variability in net income and comprehensive income as prices change. Share price risk includes the impact of foreign exchange. The Corporation does not have any hedges against price risk.

Liquidity Risk

Liquidity risk is the risk that the Corporation, including its Facilities, will not be able to meet its financial obligations as they fall due. The Corporation manages liquidity risk through the management of its capital structure and financial leverage. The Corporation also manages liquidity risk by continuously monitoring actual and projected cash flows and by taking into account the receipts and maturity profile of financial assets and liabilities. The board of directors of the Corporation reviews and approves operating and capital budgets, as well as any material transactions out of the ordinary course of business.

12. RELATED PARTY TRANSACTIONS

A member of the Corporation's board of directors is a minority owner of a Facility of the Corporation and a member of an ownership group that owns and leases hospital real estate to the Facility, for which the Facility paid rent for the nine months ended September 30, 2020 of \$3.4 million (September 30, 2019: \$3.4 million).

Certain Facilities routinely enter into transactions with related parties for provision of services relating to the use of facilities and equipment. These parties are considered related as the Facilities have significant influence over these parties. Such transactions are in the normal course of operations and are measured at the exchange amount, which is the amount of consideration established and agreed by the related parties. As of September 30, 2020, SFSH had a balance payable to South Dakota Interventional Pain Institute, LLC of \$0.9 million (December 31, 2019: \$1.0 million). For the nine months ended September 30, 2020, BSHS paid Mountain Plains Real Estate Holdings, LLC \$0.1 million for the use of a facility (September 30, 2019: \$0.1 million).

SFSH has a wholly owned subsidiary designed to function as an accountable care organization ("ACO"). The ACO was approved for participation in the Medicare Shared Savings Program, which is an incentive program established under the provisions of the PPACA. As one of the initiatives of the ACO, SFSH entered into an agreement with Great Plains Surgical, LLC ("Great Plains"), an entity controlled by certain indirect non-controlling owners of SFSH, for the provision of management services in relation to the orthopedic service line at SFSH to improve the quality of services provided and realize savings on implants and other supplies used in that service line. In addition to the payment of fees for providing management of the orthopedic service line, Great Plains is entitled to receive performance payments for realized cost savings and the attainment of quality levels.

The following is a summary of transactions at each Facility with their respective related parties during the reporting periods:

<i>Unaudited</i> <i>In thousands of U.S. dollars</i>		Three Months Ended September 30,		Nine Months Ended September 30,	
Entity	Nature of services or goods received	2020	2019	2020	2019
		\$	\$	\$	\$
ASH	Lease of facility building, anesthesia equipment lease, and sub-lease of MRI equipment.	1,141	1,140	3,418	3,416
OSH	Provision of office and management services, lease of hospital building, and lease of office space.	392	392	1,176	1,175
BHSH	Provision of physical therapy services, physician professional services, intraoperative monitoring services, and provision of parking space.	125	182	468	638
SFSH	Provision of management services in relation to orthopedic service line at SFSH, physician professional fees, anesthesia services, physical and occupational therapy services, medical products and implants, lithotripter services, laundry services, facility and related equipment, and shared services.	2,573	2,572	7,224	7,476

13. CRITICAL ACCOUNTING JUDGMENTS AND ESTIMATES

The Corporation estimates certain amounts reflected in its financial statements based on historical experience, current trends and other assumptions that are believed to be reasonable under the circumstances. Actual results could differ from those estimates because of the uncertainties inherent in making assumptions and estimates regarding unknown future outcomes. Note 21.26 to the annual financial statements details critical accounting judgments and estimates used in the preparation of the Corporation's financial statements.

The accounting estimates discussed below are highlighted because they require difficult, subjective, and complex management judgments. The Corporation believes that each of its assumptions and estimates is appropriate to the circumstances and represents the most likely future outcome.

Revenue

Facility service revenue is recorded in the period when healthcare services are provided based on actual amounts received and the estimated net realizable amounts due from patients and payors. The amounts due are estimated using established billing rates less adjustments required by contractual arrangements with the payors. Estimates of contractual adjustments are based on the payment terms specified in the related contractual agreements and payment history. Payor contractual payment terms are generally based on predetermined rates per procedure or discounted fee-for-service rates. For payors for which the Facilities do not have contracts, the Facilities estimate the necessary adjustments based on a twelve-month history of reimbursements on closed cases. Revenue is only recorded where collectability is highly probable. As a result, certain amounts for self-paying patients are not recognized in revenue.

Despite recognizing the PPP funds in government stimulus income in the period based on reasonable assurance that facilities have met the requirements for forgiveness, some uncertainty remains over the final outcome as applications for forgiveness of the PPP loans must still be formally submitted and approved subsequent to September 30, 2020.

Allowance for Non-Collectible Receivable Balances

The Facilities maintain an allowance for non-collectible receivable balances for estimated losses resulting from the inability to collect on its accounts receivable. To arrive at the allowance for non-collectible receivable

balances, management uses estimates of future collections of accounts receivable that differ from the original estimates used at the time of revenue recognition. The allowance for non-collectible receivable balances is subject to change as general economic, industry and customer specific conditions change.

Allowance for Loan Receivable

At each balance sheet date, management assesses and calculates any changes in the loss allowance for the loan receivable from UMASH, which was recognized as credit-impaired on initial recognition, using the lifetime expected credit loss (“ECL”) model. Based on the effective interest rate that incorporated lifetime ECLs at initial recognition, management calculates the impairment loss allowance for the loan receivable at each balance sheet date, using probability-weighted scenarios of cash flows from the loan receivable. The difference between the computed loan balance net of the loss allowance and the carrying value of the loan as at the reporting date is recorded as an impairment gain or loss.

Management is required to use judgment in determining the scenarios and their probabilities, which is reassessed at each balance sheet date. Factors related to UMASH that are considered in assessing the probability-weighted scenarios include: cash and liquidity position; historical and projected operating results and free cash flows; compliance with financial covenants as stipulated by the loan agreement; ability to make timely principal and interest payments; and ability to obtain alternative financing at maturity.

Based on the assessment as at September 30, 2020, management recorded an impairment gain on the loan receivable of \$0.7 million for the nine months ended September 30, 2020.

Impairment of Non-Financial Assets

Non-financial assets that have an indefinite useful life, such as goodwill and trade names, are tested at least annually for impairment and when events or changes in circumstances indicate that the carrying amount may not be recoverable. Non-financial assets that have definite useful life and are subject to amortization are reviewed for impairment when events or changes in circumstances indicate that the carrying amount may not be recoverable.

The methodology used to test for impairment includes significant judgment, estimates, and assumptions. Impairment exists when the carrying amount of an asset or cash-generating unit (“CGU”) exceeds its recoverable amount, which is calculated based on two approaches: 1) the estimated future cash flows, discounted to their present value using a post-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset, and 2) the trailing twelve months and estimated future EBITDA multiplied by a market multiple relevant to the CGU. As a result, any impairment losses are a result of management’s best estimates of expected revenues, expenses, cash flows, discount rates, and market multiples at a specific point in time. These estimates are subject to measurement uncertainty as they are dependent on factors outside of management’s control. In addition, by their nature, impairment tests involve a significant degree of judgment as expectations concerning future cash flows and the selection of appropriate market inputs are subject to considerable risks and uncertainties.

Management is required to use judgment in determining the grouping of assets to identify their CGUs for the purposes of testing fixed assets for impairment. Judgment is further required to determine appropriate groupings of CGUs for the level at which goodwill and indefinite life intangible assets are tested for impairment.

Management has identified six CGUs for which impairment testing is performed. The MFC Nueterra ASCs, which are managed as a network, collectively represent one CGU. The remaining Facilities represent subsidiary operations which are independent of each other, and are therefore identified as separate CGUs. In addition, judgment is used to determine whether a triggering event has occurred requiring an impairment test to be completed.

Factors considered by management in determining a triggering event include: deterioration in market and economic conditions, volatility in the financial markets causing declines in the Corporation's share price, increases in the Corporation's weighted-average cost of capital, changes in valuation multiples, changes to healthcare legislation in the United States both federally and in the jurisdictions in which the Facilities operate, changes to the physician complement at the Facilities, decreases in expected future reimbursement rates, declining patient referrals, physical conditions of facilities and equipment, and increased costs of inputs, such as drugs, supplies, and labour.

When considered significant, management incorporates changes to these factors in its estimated future cash flows to assess the impact on the recoverable value of its non-financial assets.

Management calculates the recoverable amount of each CGU using EBITDA specific to each CGU by a multiple determined using market data, such as EBITDA to market capitalization ratios of comparable publicly traded companies and recent prices for capital transactions within the industry. Management has estimated cost to dispose to be 1% of the fair value of the CGUs, based on recent market data. To assess reasonableness of recoverable amounts, management reconciles the recoverable amounts of its CGUs to the enterprise value of the Corporation as at December 31 based on (i) the market capitalization of the outstanding common shares, taking into account a 20% equity control premium attributable to the common shares and (ii) the Corporation's portion of the Facilities' long-term debt, less (iii) cash on hand.

Management performed an assessment of impairment indicators mentioned above as at September 30, 2020, and determined that, due to an improved performance since the last impairment testing performed as at June 30, 2020 as a result of the COVID-19 pandemic, no further indications of impairment were noted.

Taxes

Uncertainties exist with respect to the interpretation of complex tax regulations and the amount and timing of deferred taxable income. The Corporation's income tax assets and liabilities are based on interpretations of income tax legislation across various jurisdictions in Canada and the United States. The Corporation's effective tax rate can change from year to year based on the mix of income among different jurisdictions, changes in tax laws in these jurisdictions, and changes in the estimated value of deferred tax assets and liabilities. The Corporation's income tax expense reflects an estimate of the cash taxes the Corporation is expected to pay for the current year and a provision for changes arising in the values of deferred tax assets and liabilities during the year. The carrying value of these assets and liabilities is impacted by factors such as accounting estimates inherent in these balances, management's expectations about future operating results, and previous tax audits and differing interpretations of tax regulations by the taxable entity and the responsible tax authorities. Such differences in interpretation may arise on a wide variety of issues depending on the conditions prevailing in the respective legal entity's domicile. On a regular basis, management assesses the likelihood of recovering value from deferred tax assets, such as loss carry forwards, as well as from the depreciation of capital assets, and adjusts the tax provision accordingly.

Deferred tax assets are recognized for all unused tax losses to the extent that it is probable that taxable profit will be available against which the losses can be used. Significant management judgment is required to determine the amount of deferred tax assets that can be recognized, based on the likely timing and the level of future taxable profits together with future tax-planning strategies. If management's estimates or assumptions change from those used in current valuation, management may be required to recognize an adjustment in future periods that would increase or decrease deferred income tax asset or liability and increase or decrease income tax expense.

14. DISCLOSURE CONTROLS AND PROCEDURES AND INTERNAL CONTROLS OVER FINANCIAL REPORTING

Management is responsible for the financial information published by the Corporation. In accordance with National Instrument 52-109 *Certification of Disclosure in Issuers' Annual and Interim Filings*, the Chief Executive Officer (“CEO”) and the Chief Financial Officer (“CFO”) have certified that the quarterly filings fairly present in all material respects the financial condition, results of operations and cash flows and have also certified regarding controls as described below.

Under the supervision of, and with the participation of the CEO and the CFO, management has designed disclosure controls and procedures (“DC&P”) to provide reasonable assurance that (i) material information relating to the Corporation, including its consolidated subsidiaries, is made known to the CEO and the CFO by others within those entities for the period in which the annual and interim filings of the Corporation are being prepared, and (ii) information required to be disclosed by the Corporation in its annual filings, interim filings or other reports filed or submitted by it under securities legislation is recorded, processed, summarized and reported within the time periods specified in applicable securities legislation.

In addition to DC&P, under the supervision of, and with the participation of the CEO and the CFO, management has designed internal controls over financial reporting (“ICFR”) using the 2013 Committee of Sponsoring Organizations of the Treadway Commission framework to provide reasonable assurance regarding the reliability of financial reporting and the preparation of the consolidated financial statements for external purposes in accordance with IFRS.

During the period beginning on April 1, 2020 and ending on June 30, 2020, the Corporation has added procedures around the government stimulus income to its ICFR to ensure its compliance with the conditions and requirements mandated by each government assistance program.

There have been no other changes in the Corporation’s ICFR during the period beginning on July 1, 2020 and ending on September 30, 2020, that have materially affected, or are reasonably likely to materially affect, the Corporation’s ICFR.

15. RISK FACTORS

The Corporation’s annual MD&A contains a summary of risk factors pertaining to the Corporation, which should be read in conjunction with the detailed information on risk factors appearing in the Corporation’s most recently filed annual information form available on SEDAR at www.sedar.com. There have been no changes in the nature or the number of risk factors pertaining to the Corporation since the date of the most recently filed annual information form (March 30, 2020). The disclosures in this MD&A are subject to the risk factors outlined in those materials. Furthermore, continued disruptions to its business as a result of the COVID-19 pandemic could heighten those risk factors, any of which could have a material adverse effect on the Corporation’s results of operations and financial position. For additional discussions on the risk factors related to the COVID-19 pandemic, refer to Section 3 “Business Overview” of this MD&A under the heading “COVID-19.”

16. NEW AND REVISED IFRS NOT YET ADOPTED

There are no relevant new and revised IFRS that have been issued but are not yet effective, and not yet adopted by the Corporation.
