

ATRIUM MORTGAGE INVESTMENT CORPORATION
CANADA'S PREMIER NON-BANK LENDER™

SECOND QUARTER 2014

JUNE 30, 2014

ATRIUM
MORTGAGE INVESTMENT
CORPORATION

FOR IMMEDIATE RELEASE

**ATRIUM MORTGAGE INVESTMENT CORPORATION
GENERATES 8.9% INCREASE IN EARNINGS OVER PREVIOUS QUARTER,
RECORD EARNINGS OF \$5.3 MILLION**

TORONTO: July 24, 2014 – Atrium Mortgage Investment Corporation (TSX: AI, AI.DB, AI.DB.A) today released its financial results for the three and six month periods ended June 30, 2014.

Highlights

- **Earnings up 8.9% over previous quarter to \$5.3 million**
- **\$0.23 earnings per share for the quarter – 4.5% increase over previous year**
- **\$0.46 earnings per share year-to-date – 9.5% increase over previous year**
- **Mortgages increased to \$382 million, 36% increase over two quarters**
- **High quality mortgage portfolio**
 - **86.7% first mortgages**
 - **96.1% of loan portfolio is less than 75% loan to value**
 - **Continued focus on lower risk real estate sectors**

“We are delighted to report continued strong growth of our mortgage portfolio and earnings” noted Robert Goodall, CEO of Atrium. He continued, “Our strategy of focusing on quality loans with long-term customers has resulted in us achieving record earnings and a high quality portfolio consisting of 87% first mortgages.”

Interested parties are invited to participate in a conference call with management on Friday, July 25, 2014 at 9:00 a.m. EDT. Please refer to the call-in information at the end of this news release.

Results of operations

For the three months ended June 30, 2014, mortgage interest and fees aggregated \$8.3 million, compared to \$5.8 million in the comparative period, an increase of 41.9%. The weighted average interest rate on our mortgage portfolio stayed constant at 8.7% at June 30, 2014, the same as it was at December 31, 2013. Operating expenses, excluding the provision for mortgage losses, for the three months ended June 30, 2014 were \$1.0 million, or 12.5% of revenues, compared to \$0.8 million or 13.4% of revenues in the comparative period. Net earnings for the three months ended June 30, 2014 aggregated \$5.3 million, an increase of 15.3% from net earnings of \$4.6 million in the comparative quarter. Basic and diluted earnings per common share were \$0.23, for the period ended June 30, 2014, compared with basic and diluted earnings of \$0.22 per common share for the comparative period in June 30, 2013.

For the six months ended June 30, 2014, mortgage interest and fees aggregated \$15.9 million, compared to \$10.9 million in the comparative period, an increase of 45.8%. Operating expenses, excluding the provision for mortgage losses, for the six months ended June 30, 2014 were \$2.0 million, or 12.6% of revenues, compared to \$1.6 million or 14.2% of revenues in the comparative period. Net earnings for the six months ended June 30, 2014 aggregated \$10.1 million, an increase of 15.4% from net earnings of \$8.8 million in the comparative quarter. Basic and diluted earnings per common share were \$0.46, for the six months ended June 30, 2014, compared with basic and diluted earnings of \$0.42 and \$0.41, respectively, per common share for the comparable period in the previous year.

Mortgage portfolio

Atrium's mortgage portfolio consist of 160 mortgage loans and aggregated \$382 million at June 30, 2014, an increase of 35% from December 31, 2013.

<u>Mortgage category</u>	<u>June 30, 2014</u>			<u>December 31, 2013</u>

As of June 30, 2014 the average outstanding mortgage balance was \$2.4 million (December 31, 2013 – \$2.2 million), and the median outstanding mortgage balance was \$1.4 million (December 31, 2013 – \$1.4 million).

Further information

For further details please refer to Atrium’s financial statements for the three and six month periods ended June 30, 2014, and its management’s discussion and analysis for the same period, available on SEDAR at www.sedar.com, and on the company’s website at www.atriummic.com.

Conference call

Interested parties are invited to participate in a conference call with management on Friday, July 25, 2014 at 9:00 a.m. EDT. To participate or listen to the conference call live, please call 1 (866) 222-0265 or (416) 640-5942. For a replay of the conference call (available until August 10, 2014) please call 1 (866) 245-6755, Passcode 706248.

About Atrium

Canada’s Premier Non-Bank Lender™

Atrium is a non-bank provider of residential and commercial mortgages that lends in major urban centres in Canada where the stability and liquidity of real estate are high. Atrium’s objectives are to provide its shareholders with stable and secure dividends and preserve shareholders’ equity by lending within conservative risk parameters.

Atrium is a Mortgage Investment Corporation (MIC) as defined in the *Income Tax Act*. Accordingly, Atrium is not taxed on income provided that its taxable income is paid to its shareholders in the form of dividends within 90 days after December 31 each year. Such dividends are generally treated by shareholders as interest income, so that each shareholder is in the same position as if the mortgage investments made by the company had been made directly by the shareholder. For further information, please refer to regulatory filings available at www.sedar.com or Atrium’s website at www.atriummic.com.

MD&A

MANAGEMENT'S DISCUSSION
AND ANALYSIS

SECOND QUARTER 2014
JUNE 30, 2014

Management's Discussion and Analysis

June 30, 2014

Our business

We are a mortgage lender that fills the lending gap caused by the limited number of financial institutions operating in Canada. We lend in major urban centres where the stability and liquidity of real estate are at the highest levels. We focus on loans that cannot be placed with financial institutions but that represent an acceptable underwriting risk. We invest in mortgages secured by all types of residential, multi-residential and commercial real property located in Canada, subject to compliance with our investment policies. Our strategy is to grow in a controlled manner by diversifying geographically, and focusing on those real estate sectors with the lowest risk profiles.

Our investment objectives are to preserve our shareholders' equity and to provide our shareholders with stable and secure dividends from our investments in mortgage loans within the criteria mandated for a Mortgage Investment Corporation (MIC). Working within conservative risk parameters, we endeavour to maximize income and dividends through the sourcing and efficient management of our mortgage investments.

Highlights

For the quarter ended June 30, 2014, we earned \$5.3 million (\$0.23 per share, basic and diluted), compared to \$4.6 million (\$0.22 per share, basic and diluted) for the quarter ended June 30, 2013.

During 2014, we actively managed the risk profile of our mortgage portfolio, and currently target commercial real estate, low-rise infill developments and single family mortgages. Infill development loans and single family mortgages were, until recently, dominated by the banks, who have been pressured politically to reduce their exposure to real estate. Their reduced involvement has allowed Atrium to increase its mortgage business in these low risk sectors.

We declared a regular dividend of \$0.068333 per share for each month in the first two quarters of 2014, a total of \$0.205 for each quarter and a rate of \$0.82 per year.

We had \$382 million of mortgages as at June 30, 2014, an increase of 36% from December 31, 2013. During the quarter, \$49.1 million of new mortgages were advanced, and \$11.7 of mortgages were repaid.

As of June 30, 2014 the average outstanding mortgage balance was \$2.4 million (December 31, 2013 – \$2.2 million), and the median outstanding mortgage balance was \$1.4 million (December 31, 2013 – \$1.4 million).

Analyses of our mortgages as at June 30, 2014 by type of mortgage, nature of the underlying property, and location of the underlying property is set out on the next page. That table shows the *weighted average interest rate* excluding lender fees paid by the borrower which reflects the yield to Atrium including mortgage discount or premium (if any). This is a “non-GAAP” measurement that is supplementary to the GAAP measurements in our financial statements. Management uses this measurement because it is based solely upon the interest paid by the borrower, and thus provides a way of assessing changes in market conditions.

Description	Number of mortgages	Amount	Percentage	Weighted average interest rate*
Type of mortgage				
First mortgages	140	\$331,396,921	86.7%	8.4%
Second and third mortgages	20	50,841,379	13.3%	10.5%
	160	\$382,238,300	100%	8.7%

Commercial	34	142,408,500	37.3%	8.8%
	160	\$382,238,300	100%	8.7%
Location of underlying property				
Greater Toronto Area	131	\$299,247,924	78.3%	8.7%
Non-GTA Ontario	7	29,567,545	7.7%	8.3%
British Columbia	5	10,681,916	2.8%	9.7%
Alberta	17	42,740,915	11.2%	8.7%
	160	\$382,238,300	100%	8.7%

* See definition in preceding paragraph

We have an exceptionally high percentage of our portfolio invested in first mortgages (86.7%), which is a core strategy and is unmatched by our peer group.

The weighted average loan-to-value ratio in our mortgage portfolio is 64.4%, with 96.1% of the portfolio below 75% loan-to-value.

	June 30, 2014	%	December 31 2013	%	% change
Conventional first mortgages	\$316,587,447	82.8%	\$249,328,347	88.3%	27.0%
Conventional second and third mortgages	48,403,229	12.7%	25,711,093	9.1%	88.3%
Non-conventional mortgages	14,911,510	3.9%	4,886,599	1.7%	205.2%
Other	2,336,114	0.6%	2,433,526	0.9%	(4.0)%
	\$382,238,300	100%	\$282,359,565	100%	35.4%

Conventional mortgages are those mortgages with a loan-to-value of less than or equal to 75%. Seventy-five percent (75%) loan-to-value is the industry norm for determining a 'conventional' versus non-conventional mortgage. Non-conventional mortgages are those mortgages with a loan-to-value is in excess of 75%.

The weighted average term remaining for our mortgages receivable at June 30, 2014 is 13.3 months (December 31, 2013 – 13.5 months).

Our business

We are a mortgage lender that fills the lending gap caused by the limited number of financial institutions operating in Canada. We lend in major urban centres where the stability and liquidity of real estate are at the highest levels. We focus on loans that cannot be placed with financial institutions but that represent an acceptable underwriting risk. The weighted average loan-to-value ratio of our mortgage portfolio, as a whole, at the time of underwriting each loan in our portfolio, will not exceed 75%. A typical loan in our portfolio has an interest rate of 8% to 10% per annum, a one or two-year term and monthly interest-only mortgage payments.

Our lending parameters are as follows:

- First or second mortgages on income-producing real estate up to a maximum of 85% of appraised value.
- Mortgages on residential and commercial properties up to a maximum of 75% of appraised value.
- Loans on single family residences up to 75% of appraised value.
- Construction loans up to a maximum of 90% of cost.
- Loans to condominium corporations.

Mortgage loan amounts are generally \$300,000 to a maximum of \$20 million. The largest single mortgage in our mortgage portfolio as at June 30, 2014 was \$13.7 million. For loan amounts in excess of \$15 to \$20 million, we generally co-lend with a financial institution or private lender. The parameters listed above are our maximum mortgage lending parameters. At June 30, 2014, the weighted average loan-to-value ratio of the mortgage portfolio was 64.4%, compared to 64.1% at December 31, 2013.

Our investment policies, which may be changed by our board of directors, are as follows:

- We invest only in residential mortgages, commercial mortgages, commercial mortgage backed securities and certain related investments.
- All investments must be in mortgages on the security of real property situated within Canada, or in certain permitted interim investments.
- Commercial mortgages may not constitute more than 50% of our total assets at any time.
- The term of the mortgage must be no greater than ten years.
- The maximum mortgage or portion of a mortgage is \$20,000,000.
- No single borrower may account for more than 15% of our total assets.
- All mortgages are supported by external appraisals by a qualified appraiser. All mortgages, except mortgages secured against a single residence, are supported by environmental audits.
- The maximum initial loan-to-value ratio of a mortgage is 85%, including any prior ranking encumbrances, and the maximum weighted average loan-to-value ratio of our mortgage portfolio, as a whole, at the time of underwriting each loan in our portfolio, is 75%.
- Our ratio of debt to equity must be less than 1:1.
- We do not invest directly in real property, although real property may be acquired through foreclosing on a mortgage.
- Any investment: (i) of \$1,000,000 or more requires approval of the board; (ii) of between \$500,000 and \$1,000,000 requires approval of three members of the board, including at least two independent directors; (iii) of \$500,000 or less requires approval of any one member of the board; and (iv) for a mortgage previously approved by the board but where the mortgage amount exceeds the amount so approved by up to \$100,000, requires approval of three members of the board. However, we may invest in interim investments that are guaranteed by the Government of Canada or of a province or territory of Canada or deposits or certificates of deposits, acceptances and other similar instruments issued, endorsed or guaranteed by a Schedule I Bank in any amount without prior board approval.
- We may not make unsecured loans to, nor invest in securities issued by, our manager or its affiliates, nor make loans to the directors or officers of the manager.
- We may not make any investment, or incur any indebtedness, that would result in our not qualifying as a MIC.

Our investment objectives are to preserve our shareholders' equity and to provide our shareholders with stable and secure dividends from our investments in mortgage loans within the criteria mandated for a MIC. Working within conservative risk parameters, we endeavour to maximize income and dividends through the sourcing and efficient management of our mortgage investments.

We are a non-bank lender and invest in mortgages secured by all types of residential, multi-residential and commercial real property located in Canada, subject to compliance with our investment policies. The types of properties that we finance include residential houses, small multi-family residential properties comprised of six or fewer units, residential apartment buildings, mixed-use residential apartments and store-front properties, commercial properties, residential and commercial land development sites and construction projects. We also invest in short-term bridge financing for real estate developers. Our strategy is to grow in a controlled manner by diversifying geographically, and focusing on real estate sectors with the lowest risk profiles.

We qualify as a MIC and are restricted from any activity that would result in us failing to qualify as a MIC. In order to qualify as a MIC, we must satisfy the requirements in subsection 130.1(6) of the ITA throughout the taxation year. Among the requirements are:

- We can only invest or manage funds and cannot manage or develop real property.
- We cannot own debts secured on real property situated outside Canada, debts owing by non-residents unless such debts were secured on real property situated in Canada, shares of the capital stock of corporations not resident in Canada, or real property situated outside of Canada or any leasehold interest in such property.
- No shareholder (together with related persons, as defined in the ITA) may at any time own, directly or indirectly, more than 25% of our common shares.
- The cost for tax purposes of cash on hand, debts secured on specified residential properties, and funds on deposit with a Canada Deposit Insurance Fund or Régie de l'assurance-dépôts du Québec-insured institution or credit union must constitute at least 50% of the cost of all of our property.
- The cost for tax purposes of any interests in real property (including leaseholds but excepting real or immovable property acquired by foreclosure after default by the mortgagor) may not exceed 25% of the cost of all of our property.
- There are certain restrictions as to our maximum debt-to-equity ratio.

We are managed by Canadian Mortgage Capital Corporation (the “manager” or “CMCC”), which is our exclusive manager and arranges and services our mortgage loans and otherwise directs our affairs and manages our business.

For explanations as to some of the terms used herein, please refer to our Annual Information Form for the year ended December 31, 2013, which is available at www.sedar.com.

Results of operations – Three months ended June 30, 2014

For the three months ended June 30 2014, mortgage interest and fees aggregated \$8.3 million, compared to \$5.8 million in the comparative period, an increase of 41.9%. The weighted average interest rate on our mortgage portfolio stayed constant at 8.7% at June 30, 2014, the same as it was at December 31, 2013.

Operating expenses, excluding the provision for mortgage losses, for the three months ended June 30, 2014 were \$1.0 million, or 12.5% of revenues, compared to \$0.8 million or 13.4% of revenues in the comparative period. The provision for mortgage losses was \$0.1 million in the quarter to bring the total provision to 30 basis points (0.3%) of the mortgage portfolio. Operating expenses include mortgage servicing and other fees paid to the manager (that is, the management fee plus HST) that aggregated \$0.8 million for the period ended June 30, 2014, compared with \$0.6 million in the prior year period, reflecting the growth of our mortgage portfolio.

Financing costs for the three months ended June 30, 2014 were \$1.9 million, or 22.7% of revenues, compared to \$0.4 million or 7.3% of revenues in the comparative period. This increase is due to the increased use of our bank line of credit compared to the comparable period, and two convertible debentures, one issued during 2013 and one during the prior quarter. During the first quarter of 2013 we made relatively limited use of our bank line of credit because of an issuance of common shares during December 2012. During the second quarter of 2014 we were successful in using an increased amount of financial leverage to improve earnings for the quarter compared with the comparable period in the previous year. Total bank debt (including the operating line) still only represented 18.5% of the total mortgage portfolio. Total debt (including bank debt, operating line and convertible debentures) also remains very modest at 34.5% of the total mortgage portfolio.

Net earnings for the three months ended June 30, 2014 were \$5.3 million, an increase of 15.3% from net earnings of \$4.6 million in the same period in the prior year. Basic and diluted earnings per common share were \$0.23, for the period ended June 30, 2014, compared with basic and diluted earnings of \$0.22 per common share for the comparable period in the previous year. During the three months ended June 30, 2014, we funded mortgages aggregating \$49.1 million. Of these advances, \$32.1 million were first mortgages, representing 65.4% of the total loans funded. Three of these advances were on properties in British Columbia, 18 were on properties in Alberta, one was non-GTA Ontario, and the remaining 27 were made in the Greater Toronto Area. There were \$11.7 million of repayments during the period. The total mortgage portfolio increased from \$344.8 million to \$382.2 million during the period.

Results of operations – Six months ended June 30, 2014

For the six months ended June 30 2014, mortgage interest and fees aggregated \$15.9 million, compared to \$10.9 million in the comparative period, an increase of 45.8%. The weighted average interest rate on our mortgage portfolio stayed constant at 8.7% at June 30, 2014, the same as it was at December 31, 2013.

Operating expenses, excluding the provision for mortgage losses, for the six months ended June 30, 2014 were \$2.0 million, or 12.6% of revenues, compared to \$1.6 million or 14.2% of revenues in the comparative period. The provision for mortgage losses was \$0.6 million in the six months ended June 30, 2014 to bring the total provision to 30 basis points (0.3%) of the mortgage portfolio. Operating expenses include mortgage servicing and other fees paid to the manager (that is, the management fee plus HST) that aggregated \$1.5 million for the six months ended June 30, 2014, compared with \$1.1 million in the prior year period, reflecting the growth of our mortgage portfolio.

Financing costs for the six months ended June 30, 2014 were \$3.2 million, or 20.4% of revenues, compared to \$0.6 million or 5.1% of revenues in the comparative period. This increase is due to the increased use of our bank line of credit compared to the comparable period, and two convertible debentures, one issued during 2013 and one during the prior quarter.

Net earnings for the six months ended June 30, 2014 aggregated \$10.1 million, an increase of 15.4% from net earnings of \$8.8 million in the prior year. Basic and diluted earnings per common share were \$0.46, for the six months ended June 30, 2014, compared with basic and diluted earnings of \$0.42 and \$0.41, respectively, per common share for the comparable period in the previous year. During the six months ended June 30, 2014, we funded mortgages aggregating \$142.0 million. Of these advances, \$114.4 million were first mortgages, representing 80.6% of the total loans funded. Five of these advances were on properties in British Columbia, 18 were on properties in Alberta, six were non-GTA Ontario, and the remaining 44 were made in the Greater Toronto Area.

Liquidity and capital resources

At June 30, 2014, we had bank indebtedness and operating line outstanding of \$70.8 million. The operating line is provided by a syndicate of two major chartered banks drawn through a combination of banker acceptances and bank loans in order to minimize our borrowing costs. We are in compliance with the covenants required in our operating credit facility as at June 30, 2014, and we expect to remain in compliance with such covenants going forward. We have two convertible debentures outstanding, aggregating \$61.0 million of book value at June 30, 2014.

Growth in our mortgage portfolio has historically been financed by the issuance of common shares and by the issuance of convertible debt. We expect to be able to generate sufficient funds for future mortgage loan investments through a combination of common share issuances, convertible debt, and the operating credit facility.

Investing activities during the six months ended June 30, 2014 consisted of advances on new mortgage loan investments of \$142.0 million, less repayments received of \$44.9 million, for net cash used for net new mortgage loan investments of \$97.1 million.

Sources of cash from financing activities during the six months ended June 30, 2014 consisted primarily of drawings under our bank operating line and the issuance of convertible debentures and common shares. Draws less repayments under our operating facility represented a \$34.6 million use of cash.

During the quarter, we issued common shares which resulted in \$34.0 million of cash, net of issue costs. Net cash provided by financing activities was \$89.0 million after paying dividends of \$9.9 million for the six months ended June 30, 2014.

Changes in financial position

Bank indebtedness, bankers' acceptances and bank loans payable (under our operating credit facility) increased to a total of \$70.8 million at June 30, 2014, from \$36.2 million at December 31, 2013, reflecting our objective of using a prudent amount of leverage to improve shareholder returns. As at June 30, 2014, total debt (including bank debt, operating line and convertible debentures) remained modest at 34.5% of the total mortgage portfolio.

In May 2014, we completed a public offering of \$34.6 million of common shares, the net proceeds of which were used to repay indebtedness under our operating credit facility. Accounts payable and accrued charges were \$1.1 million at June 30, 2014 compared to \$0.5 million at December 31, 2013. Dividends payable decreased to \$1.7 million at June 30, 2014 from \$2.5 million at December 31, 2013, and represent dividends declared on our common shares during the quarter and paid after each quarter-end. The decrease is because the December 31, 2013 figure reflected both the regular monthly and the special year-end dividend.

Share capital increased to \$244.7 million at June 30, 2014 from \$210.7 million at December 31, 2013 as a result of a common share issuance in the second quarter, our dividend reinvestment plan (DRIP), and the manager's employee share purchase plan (ESPP).

Contractual obligations

Contractual obligations due at June 30, 2014 were as follows:

<u>Obligations at June 30, 2014</u>	<u>Total</u>	<u>Less than 1 year</u>	<u>1-2 years</u>	<u>3-7 years</u>
Bank indebtedness	\$ 380,292	\$ 380,292	\$ –	\$ –
Operating line	70,450,000	70,450,000		
Accounts payable and accrued liabilities	403,412	403,412	–	–
Accrued convertible debentures interest	671,143	671,143		
Dividends payable	1,662,627	1,662,627	–	–
Due to related party	267,011	267,011	–	–
Convertible debentures	<u>60,963,725</u>	<u>–</u>	<u>–</u>	<u>60,963,725</u>
Total	<u>\$ 134,798,210</u>	<u>\$ 73,834,485</u>	<u>\$ –</u>	<u>\$ 60,963,725</u>

Off-balance sheet arrangements

As at June 30, 2014, we had \$2.7 million of letters of credit (LCs) outstanding which were issued under our operating credit facility. The LCs reduce the maximum available under our operating credit facility by the amount of the LCs. The maximum available by way of LCs under our operating credit facility is \$3.0 million. LCs represent irrevocable assurances that our banks will make payments in the event that a customer cannot meet its obligations to third parties. LCs carry the same credit risk, recourse and collateral security requirements as mortgages extended to customers.

Share-based payments

	<u>August 30, 2013 grant</u>	<u>August 29, 2012 grant</u>	<u>Total</u>

	<u>\$ 48,240</u>	<u>\$ 36,132</u>	<u>\$ 110,312</u>	<u>\$ 72,263</u>

Grants are provided to certain directors and employees under our deferred share incentive plan. The deferred share units vest annually over three years. Common shares are issued to participants on the vesting date of each tranche of deferred share units, unless a participant elects to defer the issuance. In addition, income deferred share units are credited to holders of deferred share units based upon dividends paid on our common shares.

Transactions with related parties

Transactions with related parties are in the normal course of business and are recorded at the exchange amount, which is the amount of consideration established and agreed to by the related parties, and are measured at fair value.

The manager is responsible for our day-to-day activities. We incurred fees management and mortgage servicing fees from a subsidiary of the manager of \$1,538,410 for the six months ended June 30, 2014 (six months ended June 30, 2013 – \$1,121,849) and \$825,855 for the three months ended June 30, 2014 (three months ended June 30, 2013 – \$606,700). Mr. Robert G. Goodall is a director and part of the key management personnel of the manager and received compensation from the manager and is also a director of Atrium. The management agreement between us and the manager contains provisions for the payment of termination fees to the manager in the event that the management agreement is terminated in certain circumstances. The manager also acts as broker for our mortgages. The manager receives origination fees from the borrowers of up to 1% of the amount being funded; origination fees

in excess of 1% are split equally between the manager and Atrium. Guarantees aggregating \$9.6 million at June 30, 2014 (December 31, 2013 – \$4.5 million) have been provided on mortgage loans made by us to a major development company of which one of our directors is an officer and director. All of these loans are in good standing.

Critical accounting estimates and policies

Our condensed interim financial statements have been prepared in accordance with International Financial Reporting Standards (IFRS) and follow International Accounting Standard 34 *Interim Financial Reporting* (IAS 34) as issued by the International Accounting Standards Board (IASB). These condensed interim financial statements should be read in conjunction with our audited financial statements for the year ended December 31, 2013. In particular, our significant accounting policies as presented in Note 3 of the financial statements for the year ended December 31, 2013, have been consistently applied in the preparation of these condensed interim financial statements.

The most subjective of these estimates relates to the valuation of mortgages receivable, and the provision for mortgage losses, as well as the measurement of the liability and equity components of our 5.25% and 6.25% convertible debentures. Management believes that its estimates are appropriate; however, actual results could differ from the amounts estimated. Estimates and underlying assumptions are reviewed each quarter. The more significant accounting policies are set out below:

Revenue recognition

Mortgage interest and fees revenue is recognized in the statement of earnings and comprehensive income using the effective interest method. Mortgage interest and fees revenue may include an origination fee from a borrower for arranging a mortgage that is included in mortgage interest and fees using the effective interest method. Mortgages that are issued at a premium or a discount are recorded at their value net of any premiums or discounts. Premiums or discounts are amortized into income over the term of the mortgage.

The effective interest method derives the interest rate that discounts the estimated future cash payments and receipts during the expected life of the mortgage receivable (or, where appropriate, a shorter period) to its carrying amount. When calculating the effective interest rate, we estimate future cash flows considering all contractual terms of the financial instrument, but not future credit losses. The calculation of the effective interest rate includes all fees and transaction costs paid or received. Transaction costs include incremental costs that are directly attributable to the acquisition or issue of the mortgage.

Mortgages receivable

A mortgage receivable, carried at amortized cost, is considered impaired when there is objective evidence that there has been a deterioration of credit quality subsequent to its initial recognition to the extent that we no longer have reasonable assurance as to the timely collection of the full amount of principal and interest. We assess mortgages receivable for objective evidence of impairment both individually and collectively. The specific and general provisions for mortgage losses are determined by taking into account the following factors:

- Delays in the collection of interest and principal
- The point at which we consider a loan to be in default (which we define as 90 days for single family residence mortgages and 30 days for all other mortgages)
- Other known factors specific to the property, the borrower or the guarantor
- Economic and other real estate market conditions in the geographic area in which a borrower's project is located
- Our judgement as to whether current economic and credit conditions are such that the actual inchoate or potential losses at the reporting date are likely to be higher or lower than the amounts suggested by historic experience
- Any other factors that apply to a particular mortgage or group of mortgages

Several of these factors above involve estimates and judgements on the part of management in determining the provisions for mortgage losses. The other key estimates used for quantifying the specific and general provisions for mortgage losses are:

- The period of time expected to elapse between the contractual maturity or interest and principal repayment dates and the date at which recovery is estimated
- The amount expected to be ultimately recovered on impaired loans, taking into account the probability of

different outcomes, where necessary

- The value of underlying security, and whether Atrium expects to take possession of the property
- The amount of any legal and other third party costs estimated to be incurred

Provisions for mortgage losses represent our best estimate of impairment of mortgages receivable at each reporting date. Judgement is required as to the timing of designating a mortgage as impaired and the amount of any provision required which is reported as a specific provision. If there is no objective evidence of impairment for an individual mortgage receivable, it is included in a group of mortgages with similar credit risk characteristics and collectively assessed for impairment for losses incurred but not identified, and reported as a general provision. For the purpose of determining the group of mortgages with similar credit characteristics, we group mortgages by their mortgage category: mixed use/commercial, house and apartment, low-rise residential, high-rise residential, construction, mid-rise residential, and other.

We review the mortgages receivable quarterly for impairment. An impairment loss is calculated as the difference between the carrying amount of the mortgage receivable and the present value of the estimated future cash flows discounted at the original effective interest rate. Losses are charged to the statements of earnings and comprehensive income and are reflected in the provision for mortgage losses.

Convertible debentures

The convertible debentures can be converted into our common shares at the option of the investor. They are compound financial instruments with two components: a financial liability, and a call option which is an equity instrument. The fair value of the liability component is measured as of the date that the debentures were issued, and the equity instrument is valued on that date based upon the difference between the fair value of the debenture and the fair value of the liability component. The measurement of the fair value of the liability component is based upon market rates of interest on similar debt instruments without the conversion feature. Expenses of issue are allocated between the two components on a *pro-rata* basis. The book value of the debt is accreted up to its face value over the life of the debentures using the effective interest method, which provides for the application of a constant interest rate over the life of the debenture. The value of the equity component is not re-measured subsequent to its initial measurement date.

Income taxes

We are and intend to maintain our status as a MIC, and as such are not taxed on income provided that it flows through to our shareholders as dividends during the year or within 90 days after December 31 each year. It is our policy to pay such dividends out to the shareholders to remain non-taxable. Accordingly, no provision for current or future income taxes is required.

Controls and procedures

Our Chief Executive Officer (CEO) and Chief Financial Officer (CFO) are responsible for establishing and maintaining disclosure controls and procedures (DC&P) and internal control over financial reporting (ICFR), as those terms are defined in National Instrument (NI) 52-109 – *Certification of Disclosure in Issuers’ Annual and Interim Filings*.

We designed the DC&P and ICFR, the latter of which was using the framework in *Internal Control – Integrated Framework* (as revised in 2013) to provide reasonable assurance that material information relating to us is made known to our CEO and CFO during the reporting period; and information required to be disclosed by us in our filings under securities legislation is recorded, processed, summarized and reported within the required time periods; and provide reasonable assurance regarding the reliability of financial reporting and preparation of financial statements for external purposes in accordance with Canadian generally accepted accounting principles (GAAP).

Our CEO and CFO evaluated the design effectiveness of the DC&P and ICFR, as defined by NI 52-109, as of June 30, 2014. Based on this evaluation, they concluded that the designs of the DC&P and ICFR were effective as of June 30, 2014. NI 52-109 also requires Canadian public companies to disclose in their MD&A any change in ICFR during the most recent fiscal quarter that has materially affected, or is reasonably likely to materially affect, ICFR. No such change to ICFR has occurred during most recently completed quarter.

It should be noted that a control system, no matter how well conceived and operated, can provide only reasonable, not absolute, assurance that the objectives of the control system are met. Because of the inherent limitations in all

control systems, no evaluation of controls can provide absolute assurance that all control issues, including instances of fraud, if any, have been detected. These inherent limitations include, among other items: (i) that management's assumptions and judgments could ultimately prove to be incorrect under varying conditions and circumstances; (ii) the impact of any undetected errors; and (iii) controls may be circumvented by the unauthorized acts of individuals, by collusion of two or more people, or by management override. The design of any system of controls is also based in part upon certain assumptions about the likelihood of future events, and there can be no assurance that any design will succeed in achieving its stated goals under all potential future conditions.

Outstanding share data

Our authorized capital consists of an unlimited number of common shares, of which 24,331,254 are issued and outstanding at June 30, 2014, and 24,346,130 are issued and outstanding as at the date hereof. In addition, as at the date hereof, 2,407,407 common shares and 2,391,054 common shares are issuable upon conversion or redemption or in respect of repayment at maturity of the outstanding 5.25% and 6.25% convertible debentures (using the conversion price of \$13.50 and \$13.30, respectively, for each common share). We also have the ESPP, a deferred share incentive plan and a dividend reinvestment plan pursuant to which common shares may be issued from time to time. These plans are each described elsewhere in this MD&A.

Non-GAAP Measurements

Our financial statements are prepared in accordance with IFRS and Canadian GAAP, as set out in Part I of the CPA Canada *Handbook*. In this MD&A we also use a non-GAAP measure that does not have a standard meaning under IFRS. This measurement is used because we believe that it conveys useful information about our performance and portfolio.

Weighted average interest rate refers to the yield that we earn on our mortgage portfolio including the effect of any discount or premium on the loan, but excluding lender fees received by us. We believe that this is a useful measure to assess the yield from our portfolio and changes in market conditions.

Risks and uncertainties

We are subject to many risks and uncertainties that may limit our ability to execute our strategies and achieve our objectives. We have processes and procedures in place in an attempt to control or mitigate certain risks, while others risks cannot be or are not mitigated. Material risks that cannot be mitigated include a significant decline in the general real estate market, interest rates changing markedly, being unable to make mortgage loans at rates consistent with rates historically achieved, not having adequate mortgage loan opportunities presented to us, and not having adequate sources of bank finance available.

Please also refer to "Notice regarding forward-looking information," above, and the "Risk Factors" section of our Annual Information Form for the year ended December 31, 2013 which is incorporated herein by reference and is available at www.sedar.com.

Forward-looking information

Certain information included in this MD&A contains forward-looking statements within the meaning of applicable securities legislation, including statements with respect to management's beliefs, estimates, and intentions, and similar statements concerning anticipated future events, results, circumstances, performance or expectations that are not historical facts. Forward-looking statements generally can be identified by the use of forward-looking terminology such as "outlook", "objective", "may", "will", "expect", "intent", "estimate", "anticipate", "believe", "should", "plans" or "continue" or similar expressions suggesting future outcomes or events. Forward looking statements regarding earnings and mortgage portfolio growth are based upon the following assumptions: that other factors such as revenues and expenses continue to follow current trends, and that current trends in our mortgage portfolio growth continue.

All forward-looking statements reflect management's current beliefs and are based on information currently available to management. These statements are not guarantees of future performance and are based on our estimates and assumptions that are subject to risks and uncertainties which could cause our actual results to differ materially

from the forward-looking statements contained in this MD&A. Those risks and uncertainties include risks associated with mortgage lending, competition for mortgage lending, real estate values, interest rate fluctuations, environmental matters and the general economic environment. For other risks and uncertainties, please refer to “Risks and uncertainties” below, and the “Risk Factors” section of our Annual Information Form for the year ended December 31, 2013 which is available at www.sedar.com. We caution that the foregoing list is not exhaustive, as other factors could adversely affect our results, performance or achievements. The reader is cautioned against undue reliance on any forward-looking statements.

Although the forward-looking information contained in this MD&A is based upon what management believes are reasonable assumptions, there can be no assurance that actual results will be consistent with these forward-looking statements. Except as required by applicable law, we undertake no obligation to publicly update or revise any forward-looking statement, whether as a result of new information, future events or otherwise.

Dividend Reinvestment Plan

A Dividend Reinvestment Plan (DRIP) is available to holders of our common shares. The DRIP allows participants to have their monthly cash dividends reinvested in additional common shares, at a discount of 2% from the market price. Shareholders who wish to enroll or who would like further information about the DRIP should contact their broker or our agent for the DRIP, Computershare Trust Company of Canada, at 1 (800) 564-6253 or www.computershare.com.

Employee share purchase plan

We have an employee share purchase plan under which participants may purchase our shares within certain limits, and the manager then matches 50% of their contribution. Thus, Atrium does not bear any of the cost of the ESPP, but issues shares from treasury upon receipt of the funds.

Environmental matters

Under various federal, provincial and municipal laws, an owner or operator of real property could become liable for the cost of removal or remediation of certain hazardous or toxic substances released on or in its properties or disposed of at other locations. We do not own any real property and thus would not attract environmental liability to which an owner would be exposed. In rare circumstances where a mortgage is in default, we may take possession of real property and may become liable for environmental issues as a mortgagee in possession. As part of the due diligence performed in respect of our mortgage loan investments, we obtain a Phase I environmental audit on the underlying real property provided as security for a mortgage, unless the manager has determined that a Phase I environmental audit is not necessary.

Responsibility of management and the board of directors

Management is responsible for the information disclosed in this MD&A, and has in place the appropriate information systems, procedures and controls to ensure that the information used internally by management and disclosed externally is materially complete and reliable. In addition, our Audit Committee and board of directors provide an oversight role with respect to our public financial disclosures, and have reviewed and approved this MD&A and the financial statements as at and for the quarter ended June 30, 2014.

Additional information

Additional information about Atrium, including our Annual Information Form for the year ended December 31, 2013, is available on SEDAR at www.sedar.com. You may also obtain further information about us from our website at www.atriummic.com.

The accompanying notes are an integral part of these financial statements.

1. NATURE OF OPERATIONS

Atrium Mortgage Investment Corporation (“the company”) is a corporation domiciled in Canada, incorporated under the Ontario *Business Corporations Act*. The address of the company’s registered head office and principal place of business is Suite 900, 20 Adelaide Street East, Toronto, Ontario M5C 2T6.

The company is a Mortgage Investment Corporation (MIC) as defined in Section 130.1(6) of the Canada *Income Tax Act* (ITA). Accordingly, the company is not taxed on income provided that its taxable income is paid to its shareholders in the form of dividends within 90 days after December 31 each year. Such dividends are generally treated by shareholders as interest income, so that each shareholder is in the same position as if the mortgage investments made by the company had been made directly by the shareholder.

The company’s common shares are listed on the Toronto Stock Exchange (TSX) under the symbol “AI” and its convertible debentures are listed under the symbol “AI.DB” and “AI.DB.A”.

2. BASIS OF PRESENTATION

(a) Statement of compliance

These condensed interim financial statements have been prepared in accordance with International Financial Reporting Standards (IFRS) and follow International Accounting Standard 34 *Interim Financial Reporting* (IAS 34) as issued by the International Accounting Standards Board (IASB). These condensed interim financial statements should be read in conjunction with the company’s audited financial statements for the year ended December 31, 2013. In particular, the company’s significant accounting policies as presented in Note 3 of the financial statements for the year ended December 31, 2013, have been consistently applied in the preparation of these condensed interim financial statements. These condensed interim financial statements were authorized for issuance by the board of directors on July 24, 2014.

(b) Basis of measurement

These condensed interim financial statements are prepared on the historical cost basis.

(c) Functional and presentation currency

These condensed interim financial statements are presented in Canadian dollars, which is also the company’s functional currency.

(d) Use of estimates and judgements

The preparation of condensed interim financial statements in accordance with IFRS requires management to make estimates, assumptions and judgements that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the reporting date and the reported amounts of revenue and expenses during the reporting period. The most subjective of these estimates relates to: (a) valuation of mortgages receivable, which is affected primarily by the provision for mortgage losses which is determined by management’s estimate as to the required general and specific provisions; and (b) the measurement of the liability and equity components of the convertible debentures which depend upon the estimated market interest rates for a comparable debenture without the convertibility feature. Management believes that its estimates are appropriate; however, actual results could differ from the amounts estimated. Estimates and underlying assumptions are reviewed each quarter. Revisions to accounting estimates are recognized in the period in which the estimate is revised and in any future periods affected.

3. SIGNIFICANT ACCOUNTING POLICIES

The company's accounting policies and its standards of financial disclosure set out below are in accordance with IFRS and have been applied consistently.

(a) Revenue recognition

Mortgage interest and fees revenues are recognized in the statement of earnings and comprehensive income using the effective interest method. Mortgage interest and fees revenue includes the company's share of any fees received, as well as the effect of any discount or premium on the mortgage.

The effective interest method derives the interest rate that discounts the estimated future cash payments and receipts during the expected life of the mortgage receivable (or, where appropriate, a shorter period) to its carrying amount. When calculating the effective interest rate, future cash flows are estimated considering all contractual terms of the financial instrument, but not future credit losses (see Note 3 (c)). The calculation of the effective interest rate includes all fees and transaction costs paid or received. Fees and transaction costs include incremental revenues and costs that are directly attributable to the acquisition or issuance of the mortgage.

(b) Financial assets – classification, recognition and measurement

Classification of financial assets depends on the purpose for which the financial assets were acquired. Management determines the classification of financial assets at initial recognition. All of the company's financial assets are classified as loans and receivables.

All financial assets are subject to review for impairment quarterly, and written down when there is evidence of impairment.

Loans and receivables

Classification

Loans and receivables are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market. Assets in this category consist of mortgages receivable.

Recognition and measurement

Loans and receivables are initially recognized at fair value plus transaction costs and subsequently carried at amortized cost using the effective interest method. At each reporting date, management considers whether any reserves are required for credit impairment or due to changes in market interest rates.

(c) Mortgages receivable

A mortgage receivable, carried at amortized cost, is considered impaired when there is objective evidence that there has been a deterioration of credit quality subsequent to its initial recognition to the extent that the company no longer has reasonable assurance as to the timely collection of the full amount of principal and interest. The company assesses mortgages receivable for objective evidence of impairment both individually and collectively. The specific and general provisions for mortgage losses are determined by taking into account the following factors:

- Delays in the collection of interest and principal
- The point at which management considers a loan to be in default (which is defined as 90 days for single family residence mortgages and 30 days for all other mortgages)
- Other known factors specific to the property, the borrower or the guarantor
- Economic and other real estate market conditions in the geographic area in which a borrower's project is located
- Management's judgement as to whether current economic and credit conditions are such that the inchoate or potential losses at the reporting date are likely to be higher or lower than the amounts suggested by historic experience
- Any other factors that apply to a particular mortgage or group of mortgages

3. SIGNIFICANT ACCOUNTING POLICIES (continued)

(c) Mortgages receivable (continued)

Several of these factors above involve estimates and judgements on the part of management in determining provisions for mortgage losses. The other key estimates used for quantifying the specific and general provisions for mortgage losses are:

- The period of time expected to elapse between the contractual maturity or interest and principal repayment dates and the date at which recovery is estimated
- The amount expected to be ultimately recovered on impaired loans, taking into account the probability of different outcomes, where necessary
- The value of underlying security, and whether Atrium expects to take possession of the property
- The amount of any legal and other third party costs estimated to be incurred

Provision for mortgage losses represents management's best estimate of impairment of mortgages receivable at each reporting date. Judgement is required as to the timing of designating a mortgage as impaired and the amount of any provision required which is reported as a specific provision. If there is no objective evidence of impairment for an individual mortgage receivable, it is included in a group of mortgages with similar credit risk characteristics and collectively assessed for impairment for losses incurred but not identified, and reported as a general provision. For the purpose of determining the group of mortgages with similar credit risk characteristics, we group mortgages by their mortgage category: commercial/mixed use, house and apartment, low-rise residential, high-rise residential, construction, mid-rise residential, and condominium corporations.

The company reviews mortgages receivable quarterly for impairment. An impairment loss is calculated as the difference between the carrying amount of the mortgage receivable and the present value of the estimated future cash flows discounted at the original effective interest rate. Losses are charged to the statements of earnings and comprehensive income and are reflected in the provision for mortgage losses.

(d) Convertible debentures

Convertible debentures can be converted into common shares of the company at the option of the investor. They are compound financial instruments with two components: a financial liability, and a call option which is an equity instrument. The fair value of the liability component is measured as of the date that the debentures were issued, and the equity instrument is valued on that date based upon the difference between the fair value of the convertible debenture and the fair value of the liability component. The measurement of the fair value of the liability component is based upon market rates of interest on similar debt instruments without the conversion feature. Expenses of issue are allocated between the two components on a pro-rata basis. The book value of the debt is accreted up to its face value over the life of the debentures using the effective interest method, which provides for the application of a constant interest rate over the life of the debenture. The value of the equity component is not remeasured subsequent to its initial measurement date.

(e) Other financial liabilities

Other financial liabilities are non-derivative liabilities recognized initially at fair value, net of transaction costs, and are subsequently stated at amortized cost using the effective interest method. The company has classified bank indebtedness, operating line, accounts payable and accrued liabilities, dividends payable, due to related party and the liability component of convertible debentures as other financial liabilities.

(f) Income taxes

The company qualifies as a Mortgage Investment Corporation under the ITA, and as such is not taxed on income provided that its taxable income is distributed to its shareholders in the form of dividends within 90 days after December 31 each year. It is the company's policy to pay such dividends to remain non-taxable. Accordingly, no provision for current or future income taxes is required.

3. SIGNIFICANT ACCOUNTING POLICIES (continued)**(g) Earnings per common share**

Basic earnings per common share is calculated by dividing earnings during the period by the weighted average number of common shares outstanding during the period. Diluted earnings per share is calculated by adjusting the earnings attributable to common shareholders and the weighted average number of common shares outstanding for the effects of all dilutive items such as convertible debentures and deferred share incentive plans.

(h) Share-based payments

The company has an equity-settled share-based compensation plan for grants to eligible directors, officers, and senior management under its deferred share incentive plan. Grants are measured based upon the fair value of the awards granted, based on the volume weighted average trading share price for the five trading days prior to date of the grant.

4. RECENT ACCOUNTING PRONOUNCEMENTS

Certain pronouncements have been issued by the IASB or IFRS Interpretations Committee (IFRIC) that will be effective for future accounting periods. Many of these are not applicable to the company and so are not listed below. A brief summary of the new standard follows.

IFRS 9 – Financial Instruments: Classification and measurement is the first part of a new standard on classification and measurement of financial assets that will replace IAS 39, Financial Instruments: Recognition and Measurement. IFRS 9 has two measurement categories: amortized cost and fair value. All equity instruments are measured at fair value. A debt instrument is recorded at amortized cost only if the entity is holding the instrument to collect contractual cash flows and the cash flows represent principal and interest. Otherwise it is recorded at fair value through profit or loss. The effective date of the new standard has tentatively been set to be effective for our year ended December 31, 2018. The potential impact of the new standard on the company's financial statements has not been determined.

5. MORTGAGES RECEIVABLE**(a) Mortgage portfolio**

Mortgage category	June 30, 2014			December 31, 2013		
	Number	Outstanding amount	% of Portfolio	Number	Outstanding amount	% of Portfolio

Balance, end of period	<u>\$ –</u>	<u>\$ 1,146,715</u>	<u>\$ 1,146,715</u>

Six months ended June 30, 2013

	Specific	General	Total
	provision	provision	
Balance, beginning of period	\$ 527,593	\$ 560,074	\$ 1,087,667
Increase in specific provision for the period	<u>63,000</u>	<u>–</u>	<u>63,000</u>
Balance, end of period	<u>\$ 590,593</u>	<u>\$ 560,074</u>	<u>\$ 1,150,667</u>

Three mortgages were in default at June 30, 2014 (one at December 31, 2013, which was subsequently settled). Management does not expect to incur losses on the mortgages in default at June 30, 2014 taking into account market conditions, the value of real property securing the mortgages, and other factors. The increase in the general provision for mortgage losses during the period is based upon management's assessment of factors described in Note 3(c).

(c) Commitments

The company has commitments to advance additional funds under existing mortgages of \$85,328,225 and new mortgages aggregating \$19,280,000 at June 30, 2014 (December 31, 2013 – \$51,436,540, \$46,727,500). Generally, outstanding commitments are expected to be funded within the next 24 months. However, the experience of the company has been that a portion of the unfunded amounts on existing mortgages will never be drawn. (See Note 15 – Subsequent Events.)

Principal repayments based on contractual maturity dates are as follows:

Six months ended December 31,	2014	\$ 93,497,341	24.5%
Years ended December 31,	2015	153,666,937	40.2%
	2016	117,078,219	30.6%
	2017	15,815,295	4.1%
	2018	61,135	0.0%
	Thereafter	<u>2,119,373</u>	<u>0.6%</u>
		<u>\$ 382,238,300</u>	<u>100.0%</u>

6. CREDIT FACILITY

At June 30, 2014, the company had a credit facility from a syndicate of two Canadian financial institutions of \$80 million (December 31, 2013 – \$80 million) at a formula rate that varies with bank prime and the market bankers' acceptance rate. Drawings under the credit facility may be by way of a bank loan (including an overdraft of up to \$500,000), bankers' acceptances or letters of credit (LCs). The committed credit facility was effective October 10, 2013, has a term of one year, and is subject to certain conditions of drawdown and other covenants.

On January 31, 2014, the company obtained a \$30 million short-term increase in its operating credit facility, which was cancelled February 27, 2014 subsequent to issuance of convertible debentures (see Note 9 – Convertible Debentures). On April 21, 2014, the company obtained a \$30 million short-term increase in its operating credit facility, which was cancelled May 22, 2014 subsequent to issuance of public equity (see Note 10).

The credit facility is secured by a lien over all of the company's assets by means of a general security agreement. The amount that may be drawn down under the credit facility is determined by the aggregate value of mortgages that are acceptable to the lender. Under the terms of the credit facility, covenants must be met in respect of shareholders' equity, debt to total assets and interest coverage. At June 30, 2014 and December 31, 2013, the company was in compliance with these covenants.

Under the credit facility, LCs committed to clients outstanding at June 30, 2014 aggregated \$2,679,631 (December 31, 2013 – \$2,679,631). The LCs reduce the maximum availability under the credit facility by the amounts drawn. LCs represent irrevocable assurances that the company's bank will make payments in the event that a customer cannot meet its obligations to third parties. LCs carry the same credit risk, recourse and collateral security requirements as mortgages extended to customers.

	June 30 2014	December 31 2013
Credit facility		
Bankers' acceptances	\$ 50,000,000	\$ 20,000,000
Bank loan	20,450,000	15,910,000
Operating line	70,450,000	35,910,000
Bank indebtedness	380,292	325,930
Total borrowing under credit facility	70,830,292	36,235,930
Letters of credit	2,679,631	2,679,631
Total credit facility utilization	<u>\$ 73,509,923</u>	<u>\$ 38,915,561</u>

7. DIVIDENDS

The company follows a dividend policy so that it is non-taxable under the provisions of the ITA related to Mortgage Investment Corporations. Dividends amounted to \$0.205 per share for the three months ended June 30, 2014 (June 30, 2013 – \$0.20) and \$0.41 per share for the six months ended June 30, 2014 (June 30, 2013 – \$0.40).

	Six months ended June 30 2014	Year ended December 31 2013
Dividends payable, beginning of the period	\$ 2,473,437	\$ 1,826,813
Dividends declared	9,129,639	17,970,575
Dividends paid	(9,940,449)	(17,323,951)
Dividends payable, end of period	<u>\$ 1,662,627</u>	<u>\$ 2,473,437</u>

8. RELATED PARTY TRANSACTIONS

The company pays management and mortgage servicing fees to Canadian Mortgage Servicing Corporation (CMSC), a subsidiary of Canadian Mortgage Capital Corporation (CMCC) the manager of the company, which is responsible for the day to day management of the company. The majority beneficial owner and Chief Executive Officer (CEO) of the manager is also CEO of the company. The company incurred management and mortgage servicing fees from CMSC of \$1,538,410 for the six months ended June 30, 2014 (six months ended June 30, 2013 – \$1,121,849) and \$825,855 for the three months ended June 30, 2014 (three months ended June 30, 2013 – \$606,700). The management agreement between the company and CMCC contains provisions for the payment of termination fees to the manager in the event that the management agreement is terminated in certain circumstances. Unpaid amounts are in the normal course of business, non-interest bearing and due on demand. Balances due to related parties are due to CMCC and its subsidiaries and were paid within 30 days of each period end.

Guarantees aggregating \$9,587,681 at June 30, 2014 (December 31, 2013 – \$4,542,000) have been provided on mortgages to major development company of which one of the directors of the company is a director and officer. All of those loans are in good standing.

Key management includes directors and officers of the company. Compensation expenses for key management personnel include:

Share compensation expense:	<u>Three months ended June 30</u>		<u>Six months ended June 30</u>

Convertible debentures, end of period	<u>\$ 30,610,763</u>	<u>\$ 30,610,763</u>

During the six months ended June 30, 2014, the company completed a public offering of \$30,000,000 and an overallotment option of \$1,801,000 that were closed February 27, 2014 and March 5, 2014, respectively, of 6.25%, unsecured convertible debentures due March 31, 2019. The interest on the debentures is payable on March 31 and September 30 each year. Debentures are convertible into common shares at the option of the holder at any time prior to their maturity at a conversion price of \$13.30 per share, subject to various adjustments in accordance with the trust indenture. The debentures may not be redeemed by the company before March 31, 2017. After March 31, 2017 and prior to March 31, 2018, the debentures may be redeemed, in whole or in part, from time to time at the company's option at par plus accrued interest provided that the weighted average trading price of the common shares is not less than 125% of the conversion price. After March 31, 2018, the company may, at its option, redeem the debentures, in whole or in part, at par plus accrued and unpaid interest.

On issuance, the company recorded a liability of \$30,101,677, net of equity component of \$160,549 and issue costs attributable to debt of \$1,538,774.

10. SHARE CAPITAL

The company is authorized to issue an unlimited number of common shares without par value. Common shares rank equally with each other and have no preference, conversion, exchange or redemption rights. Common shares participate pro rata with respect to any dividends paid, including distributions upon termination and dissolution.

The company has an optional dividend reinvestment plan (DRIP) for shareholders, whereby participants may reinvest cash dividends in additional common shares of the company at the volume weighted average price for five days prior to distribution, less a 2% discount. Shares issued under the DRIP are issued by the company from treasury.

Under the employee share purchase plan (ESPP), each participant may contribute up to an annual maximum to the ESPP, and CMCC (the manager) will match 50% of the participant's contribution. Thus, the company does not bear any of the cost of the ESPP, but is reimbursed by CMCC and the participants.

10. SHARE CAPITAL (continued)

Six months ended June 30, 2014	Common shares	
	Number	Amount
Shares issued –		
ESPP, January 1, 2014	2,368	25,563

11. SHARE-BASED PAYMENTS

	August 30, 2013 grant	August 29, 2012 grant	Total	
Deferred shares granted	23,000	21,500	44,500	
Income deferred shares issuable	–	1,043	1,043	
Value of grant	\$ 232,900	\$ 236,500	\$ 469,400	
Share compensation expense:				
	Three months ended June 30		Six months ended June 30	
	2014	2013	2014	2013
August 30, 2013 grant	\$ 28,761	–	\$ 70,386	–
August 30, 2012 grant	19,479	36,132	39,926	72,263
	<u>\$ 48,240</u>	<u>\$ 36,132</u>	<u>\$ 110,312</u>	<u>\$ 72,263</u>

Grants are provided to certain directors and employees under the company's deferred share incentive plan. The deferred share units vest annually over three years. Common shares are issued to participants on the vesting date of each tranche of deferred share units, unless a participant elects to defer the issuance. In addition, income deferred share units are credited to holders of deferred share units based upon dividends paid on common shares. The fair value of share-based compensation was based upon the volume weighted average market price of the common shares five days prior to the grant date of August 30, 2013 (\$10.13) and August 29, 2012 (\$11.00).

13. FINANCIAL INSTRUMENTS (continued)**(b) Fair value (continued)**

The fair value hierarchy gives the highest priority to Level 1 inputs and the lowest priority to Level 3 inputs. All financial assets are classified as loans and receivables and are recorded at amortized cost. Their carrying values approximate their fair value due to their relatively short-term maturities and because market interest rates have not fluctuated significantly since the date at which the loans were entered into. The fair value of the operating line approximates book value since it bears interest at floating rates. Mortgages receivable mature between 2014 and 2024 with a weighted average term to maturity at June 30, 2014 of 13.3 months (December 31, 2013 – 13.5 months). Fair value of mortgages receivable is established by level 3 inputs.

The fair value of convertible debentures at the time of issue is established using level 2 inputs. Other financial liabilities are established using level 3 inputs. The fair value of convertible debentures has been determined based on the closing prices of the convertible debentures on the TSX on the respective dates.

Convertible debentures	<u>June 30, 2014</u>	<u>December 31, 2013</u>
Fair value	\$ 64,365,122	\$ 30,225,000
Less book value of equity component	<u>(550,280)</u>	<u>(397,539)</u>
	<u>\$ 63,814,842</u>	<u>\$ 29,827,461</u>
Book value of financial liability component	<u>\$ 60,963,725</u>	<u>\$ 30,610,763</u>

(c) Credit risk

The following asset is exposed to credit risk: mortgages receivable. Credit risk is the risk that a counterparty to a financial instrument will fail to discharge its obligation or commitment, resulting in a financial loss to the company.

The company controls the credit risk of mortgages receivable by maintaining strict credit policies including due diligence processes, credit limits, documentation requirements, review and approval of new mortgages by the board of directors or a subgroup thereof, quarterly review of the entire portfolio by the board of directors, and other credit policies approved by the board of directors. Credit risk is approved by the board of directors. At June 30, 2014 no single borrower accounted for more than 11.0% of mortgages receivable (December 31, 2013 – 14.6%).

(d) Liquidity risk

Liquidity risk is the risk that the company will not be able to meet its obligations when due. The primary sources of liquidity risk are the requirements to fund commitments for new mortgages, advances on existing mortgages, as well as obligations under the company's credit facility. The company's liquidity risk is managed on an ongoing basis by CMCC in accordance with the policies and procedures in place that reduce the risk to an acceptable level. The company's significant financial liabilities include bank indebtedness, operating line, accounts payable and accrued liabilities, dividends payable, due to related party and the liability component of convertible debentures. The bank indebtedness and operating line are drawn upon as required to discharge accounts payable and accrued liabilities as well as to pay out dividends on a monthly basis. The company's agreement with the lender is that the operating line will not be called provided that all covenants are met and that any significant excess cash is used to pay down the bank loan and indebtedness.

As at June 30, 2014, management considers that the company does not have significant exposure to liquidity risk as the credit facility is not fully utilized and the company is in compliance with all covenants.

13. FINANCIAL INSTRUMENTS (continued)**(d) Liquidity risk (continued)**

<u>Obligations at June 30, 2014</u>	<u>Total</u>	<u>Less than 1 year</u>	<u>1-2 years</u>	<u>3-7 years</u>
Bank indebtedness	\$ 380,292	\$ 380,292	\$ –	\$ –
Operating line	70,450,000	70,450,000		
Accounts payable and accrued liabilities	403,412	403,412	–	–
Accrued convertible debentures interest	671,143	671,143		
Dividends payable	1,662,627	1,662,627	–	–
Due to related party	267,011	267,011	–	–
Convertible debentures	<u>60,963,725</u>	<u>–</u>	<u>–</u>	<u>60,963,725</u>
Total	<u>\$ 134,798,210</u>	<u>\$ 73,834,485</u>	<u>\$ –</u>	<u>\$ 60,963,725</u>

(e) Interest rate risk

The company is exposed to interest rate risk in that an increase in interest rates will result in increased interest expense due to its operating line and indebtedness being set at a variable rate but all mortgages being set at fixed rates. The financial structure of the company results in relatively moderate interest rate risk because most of the company's financing is through common shares and convertible debentures, with a moderate amount of borrowings under the credit facility that bear floating interest rates.

If interest rates on debt had been one percentage point higher (lower) during the six months ended June 30, 2014, earnings would have been reduced (increased) by approximately \$640,000 during the period, assuming that no changes had been made to the interest rates at which new mortgage loans were entered into. However, if new mortgage loans had been entered into at higher (lower) interest rates, the resulting reduction of earnings would have been less than (greater than) \$640,000.

(f) Currency risk

Currency risk is the risk that the value of financial assets and liabilities will fluctuate due to changes in foreign exchange rates. The company is not currently exposed to significant currency risk as all assets and liabilities are denominated in Canadian funds.

(g) Changes to risk exposure and management of risk exposure

During the six months ended June 30, 2014, the company issued 6.25% convertible debentures with a face value of \$31,801,000 (see Note 9), which had the effect of altering its risk exposure profile to be less sensitive to changes in general market interest rates. The effect will be favourable if general interest rates increase, and adverse if general interest rates decline.

14. CAPITAL MANAGEMENT

The company defines capital as total debt plus shareholders' equity, as shown below:

	June 30	December 31
	2014	2013
Bank indebtedness	\$ 380,292	\$ 325,930
Operating line	70,450,000	35,910,000
Total bank line	70,830,292	36,235,930
Convertible debentures	60,963,725	30,610,763
Total debt	131,794,017	66,846,693
Shareholders' equity	247,260,686	212,018,978
Capital employed	<u>\$ 379,054,703</u>	<u>\$ 278,865,671</u>

The company's objectives for managing capital are to:

- preserve shareholders' equity
- provide shareholders with stable dividends
- use leverage in a conservative manner to improve return to shareholders

The company manages capital by using conservative amounts of financial leverage to improve its return to shareholders. The company finances growth of its portfolio by issuing common shares and debt. In addition, a small amount of equity is raised every month through a dividend reinvestment plan for shareholders.

As bank borrowings increase, the company could expect to raise further funds through public offering of convertible debentures and/or common shares. The company's bank indebtedness, bankers' acceptances and bank loan are subject to external covenants as set out in Note 6. There has been no change in the company's capital management objectives since the prior period.

15. SUBSEQUENT EVENTS

On July 13, 2014, the company issued 14,878 common shares (\$162,902) under its dividend reinvestment plan.

Of the principal repayments due in the six month period ended December 31, 2014, between July 1 and July 24, 2014, \$3,350,000 have been renewed in the normal course of business to be due in the year ended 2015.
